Somehow this should fit into oscillator-substance theory!

- [Hide quoted text](#) -

----- Forwarded message -----

From: Pierre Carbonnelle <pierre.carbonne...@gmail.com>
Date: Fri, Feb 6, 2009 at 12:06 PM
Subject: CMNS: Zero Point Energy, Casimir effect and hydrinos
To: CMNS <cmns@googlegroups.com>

Dear all,

Jovion recently got a patent for extracting energy from the vacuum, using the Casimir effect to create what looks like hydrinos.

Scott, Marissa, I believe that there is a strong link with Earthtech's research. Would you have any other info to share? Is there any link with cold fusion?

Thanks
Pierre Carbonnelle

Patent description
<http://nextbigfuture.com/2009/02/jovion-corporation-gets-patent-for-z...>

A system is disclosed for converting energy from the electromagnetic quantum vacuum available at any point in the universe to usable energy in the form of heat, electricity, mechanical energy or other forms of power. By suppressing electromagnetic quantum vacuum energy at appropriate frequencies a change may be effected in the electron energy levels which will result in the emission or release of energy. Mode suppression of electromagnetic quantum vacuum radiation is known to take place in Casimir cavities. A Casimir cavity refers to any region in which electromagnetic modes are suppressed or restricted. When atoms enter into suitable micro Casimir cavities a decrease in the orbital energies of electrons in atoms will thus occur. Such energy will be captured in the claimed devices. Upon emergence from such micro Casimir cavities the atoms will be re-energized by the ambient electromagnetic quantum vacuum. In this way energy is extracted locally and replenished globally from and by the electromagnetic quantum vacuum. This process may be repeated an unlimited number of times. This process is also consistent with the conservation of energy in that all usable energy does come at the expense of the energy content of the electromagnetic quantum vacuum. Similar effects may be produced by acting upon molecular bonds. Devices are described in which gas is recycled through a multiplicity of Casimir cavities. The disclosed devices are scalable in size and energy output for applications ranging from replacements for small batteries to power plant sized generators of electricity.

Hello Eski,
You have made comment... re this work of Pierre Carbonnelle which fits in exactly to the Quantum Electromagnetic Vacuum - converting Energy and available - at any given point in the Universe. It certainly does tie in with the Oscillation Theory. It could not be, without being re-energized by the ambient electromagnetic quantum vacuum.mentioned,

I have also copied an extract regarding this, (though within different wording,) in 'Double the Speed of Light', and placed it below Pierre Carbonnelle's.

It should re-open this whole theory posted some time back by me - through my eyes - in my given example of this 'Vacume and Universal Energy'. What do you see?

Regards
ka-sala

Exrtact from Double the Speed of Light
Stay in your Mind's Eye here. The Tube acts as a Protective Barrier to any harmful Radio-Active Elements, giving safe mode of travel. As the White Light acts as a Repellent, it pushes aside the Ultra - the Black Light - forming the passage-way for clear travel.
But! The Black Light closes in from behind after we have passed through, acting as a Propellant from behind, increasing the Specific Speed of Propulsion. This... is traveling at Double the Speed of Light.
It is also the Oscillating Factor of, being the driving force, coming from in front to, behind, all the way through, within this action of Propulsion. Nothing is wasted in this System. All Energies are utilized, safely.
Liken it to this as an example.
An Electromagnetic Field Force has been created due to all Energies within the Sound of Light which is Movement. Because this Energy pushes aside - lets say water (the sea,) - the Object of travel would not get wet.
The Electromagnetic Field would keep its' Radius free of water, even though, the water by it's own Replacement would close in, at the back,
and, as a Wave Force, project our Object of travel with an extra Boost of Propulsion.
From here is the preceding Discussion... Here the 'Revolutions' and 'Specific Speed' are explained.
DOUBLE THE SPEED OF LIGHT - TIME TRAVEL

Hi. KaSala,--
Like everything else, it all fits together. I looked up the Casimir Effect. The attractive force between uncharged plates in a vacuum. This does fit into Oscillator/Substance Theory, and I guess, that shouldn't ssurprise me, as yet, anything we've looked at closely seems

to fit in. The Casimir Effect would, at the most basic level be for the same reasons as gravitation--differential pressures between entities at the "sub-sub-microscopic level," the level of our pervasive oscillators. In the case of "uncharged plates" in a "vacuum" at the surface of the Earth a lot of things would be happening which could be taken advantage of to transfer motion around so as to be able to use part of it as "Useable Energy." The patent is probably valid.

The description of extraction of energy from the quantum whatever and replenish it from somewhere else is I guess as good as any.

Quantum fluctuations in a vacuum, would be localizing into "vacuum" the apparent fact that our "substance" is continuously, and impossibly always "trying to reach a state of uniformity." The only argument I'd have at all with the quantum fluctuations is that the assumption is that somehow this is a phenomenon somehow confined to vacuums rather than being universal....
Cheers, Eski

Hello Eski,
I quote you again...
"The only argument I'd have at all with the quantum fluctuations is that the assumption is that somehow this is a phenomenon somehow confined to vacuums rather than being universal...."

Don't worry about assumptions... What cannot change is that you cannot separate vacuums from being universal, otherwise you must leave out the earth!

Many things considered by some as only/or a 'phenomenon' are as real as you and me, and whether or not a 'thing' can be seen or not as Oscillation, we would have nothing without it. In this is all movement, energy, etc, by whatever name it is given. Quantum or otherwise. This in truth is a great step forward when seen in the light that it really is.

Regards,
ka-sala

Ka-Sala,
How right you are. As usual you're a step ahead of me in thinking. I think that I'm going to post something like this to the cmns group: I'll let you have first shot.--

"If Max Planck were alive today, he might have something like this to say: 'Casimir Effect. Gravitation, and every other phenomenon of our Universe is a result of differential pressures in the Substance of Existence....' If this statement be valid, then there is a chance that someone can work out a scientifically acceptable, presumably mathematical, description and do for our Universe what Galileo did for the Solar System. "

Cheers, Eski

Positron plus Negatron equals Zerotron?

$$e^- + e^+ = e^0 ?$$

A little manipulation with the idea of "electron-anti-electron annihilation" leads to the consideration of there being a neutral combination particle.

The electron and anti-electron (negatron and positron) are known to combine and disappear. This gives off energy as "annular radiation" and is known as mutual "annihilation." However, let us take a look at the situation.

Let us assume that an electron spinning in one direction along a given axis at the speed of light, meets an anti-electron travelling at the same velocity with the opposite spin orientation. As the velocity of each, in opposite vectors is "c" the speed of light, the Kinetic Energy of each is $(mc^2)/2$ and the Energy expected to be dissipated in the "head on collision" is mc^2 . However--believing Einstein--we see that we still have at least one " mc^2 " worth of energy unaccounted for as each of the two participants in the "collision" had this much Energy ascribed to them.

This indicates that there is enough Energy remaining for a particle of the same mass as either of the originals to have survived the collision. A logical thought is that, rather than a "mutual destruction," the negatron and positron simply did a "Yin-Yang" combination to a neutral unit dumping excess rotational motion as "annular" (ring-form) radiation into the plane in which they met.

There is another known process, called "pair-formation" in which radiation above a certain threshold, the same Energy as the annular radiation, will, under certain conditions, lead to the appearance of an electron and a proton. It is reasonable that a "parent entity" of the "positron and negatron," which we may call a "zerotron," " e^0 ," could be an explanation for both phenomena.

A neutral entity as a "parent to a positive-negative pair" is, of course, known. The neutron is the "neutral parent" to the electron and proton. It is not too far-fetched to suggest the following: $e^0 + \text{Energy} \rightarrow n^0 \rightarrow e^- + p^+ + \text{Energy}$. That is, that under some condition the unit which we are postulating as the predecessor of the electron and anti-electron may be converted to a neutron which then splits to the electron and proton.

Along the same lines of reasoning we may note that the Muon comes in three forms, positive, negative and neutral. Has anyone checked to see if the positive and negative forms combine to form the neutral one? Probably that would be very hard to check.

One may also suggest that there possibly be a neutral predecessor of the neutrino and anti-neutrino, a "zeroino."

Why Einstein was right.

Why Einstein was right, when he was, in his "Relativity" theorizing, was often because hidden facets of mathematics and of the definitions used in physics allowed the ideas to be usable, even if his reasonings were fallacious. In other words, often, he was lucky.

Einstein's Special Relativity, which title for it I am told he disliked, accurately describes how information is changed as the relative velocity of a transmitter/receiver pair approaches the velocity of the carrier wave. When the carrier wave velocity is taken to be the limiting relative velocity of any two independently moving objects, the Special Relativity view leads to nonsensical conclusions.

"SR" accurately predicts that "Mass" will increase when a moving object reaches the "speed of light." However, the prediction is that the mass will go to "Infinity." There are some problems with that. "Infinity" in practice, simply means that our measurement device, or our logic, fails at this point. There are two other factors, of which Einstein seems to have been unaware, which come into play here to allow his model to accurately predict a change in the situation at the speed of light.

First, even mathematics does not allow empty space. There is always an implied "dot field" or "dot matrix," so it can be expected that what ever is considered to be moving would be moving within "something."

The other factor is also mathematical. When the process of "Integration" is carried out on the momentum equation, mass times velocity equals momentum, ($m \times v = P$), this process can be carried out with either the mass or the velocity considered as the variable. If velocity varies, we get the usual kinetic energy equation, $KE = (mv^2)/2$. However, if mass be considered as the variable, with velocity constant, we obtain another energy equation, $(vm^2)/2$. This latter does not appear in the literature and has apparently been ignored. These two equations may be interpreted as indicating that "velocity" can change to a limit, if it hits a limit, and the "accelerating situation" continues, then, "mass" will change.

Neither the "dot-matrix" aspect of mathematics, nor the alternative energy formulation, seems to appear in any of Einstein's work, nor anywhere else in the readily available literature. If both the dot-matrix and the alternative energy expression that appear in the mathematics are reflected in reality, we see that any moving entity within the matrix will, itself, be a part of the matrix and the mass will be a measure of the balance of the interior of the moving entity and the remainder of the matrix. As long as the translational velocity of the moving object is small with respect to the average speed of motion in the matrix, there will be little effect of the "second" energy equation. Velocity will change and the amount of disturbance dissipated by the matrix, i.e., the "Energy" will be measured quite accurately by the "Kinetic Energy" formula. There is a change in the situation when the translational velocity of the moving object starts to equal or to exceed the average of the matrix. (In the "Universe" In which we exist, this average is known as "c," a "constant of nature" which is the "speed of light in a vacuum.") At this point there will be a significant change in the balance between the rest of the matrix and the part of the matrix within the surface of the moving entity, this surface will become changed in size and shape. The motion disturbance is no longer primarily dissipated into the matrix at large, but becomes localized at the surface of the involved entity. The balance changes, the "mass" increases. Special Relativity turns out to have been at least partially correct. The situation changes at the speed of light.

A third factor hidden in the interface between mathematics and reality apparently allows Einsteinian Space-time modelling to give quite accurate predictions. This is in the definition of "Time." In the "Space-Time World" of conventional thinking, "Time" is a reality which somehow came into being at the beginning of "Existence." Actually, time is a convenient method of keeping track of motion in sequence by a measured interval. The hidden factor that apparently makes "Space-Time" modelling work is that "Time" is always referenced to some reproducible cycle in nature. Therefore, "Time" has hidden within it not only the idea of motion, but also the idea of cyclic motion. A unit of time, a second, for instance, can therefore represent a cyclic motion, or motion in a circle, and the expression "sec²," could stand for the motion content in the volume of a sphere! This insight leads to some interesting interpretations of some of the equations of physics, which, unfortunately, are beyond the scope of the main thrust of this paper.

The "hidden factor in Time." however, makes Space-Time Modelling and Motion in a Matrix Modelling reach much the same conclusions and, at this point, they seem to be essentially equivalent approaches. The Motion in a Matrix users being, perhaps, more cognizant of why their ideas have validity. This "circle/sphere" aspect of time hints at the idea of a spherical oscillator as a basic entity. This latter idea, has become the basis of a variant of Motion in a Matrix Modelling which could be called the "Oscillator Substance Model."

The "Oscillator Substance" model, although developed independently, echoes Max Planck's ideas of dots controlled by oscillators and is the discovery of a chemist who was once trained as an electronic technician, who has, within the last year, put together insights from both fields to suggest that there is a very simple model of everything which perhaps would have been close to the "Unified Field Theory" which Einstein spent his life trying to develop but could not. We will come back to this later. First, however, since, we are focused on where Einstein was right, or wrong, we should note the errors that probably doomed Einstein's quest for a "Unified Field" from the start.

It is highly probable that the "First Fatal Error" in Einstein's Unified Field attempt was that he "Threw out the field." That is, he assumed a void, a nothingness, for the "Field" to operate in. The "Second Fatal Error" is one that modern theorists continue to make. They try to set up a unified field theory from the "Four Fundamental Forces." The problem is that the "Four Fundamental Forces" all violate the Law of Forces, "For each and every force there is an equal and opposite force." This law of forces, if examined carefully, can be interpreted to clearly indicate that any "Force" is simply a readjustment of pressures within a "substance." The "Four Fundamental Forces" are either, in two cases (Gravitation and Electro-Magnetism) descriptions of observed phenomena, which are the result of other factors, These kind of "Forces" are known as "Fictional Forces," the best known, and best explained of which is "Centrifugal Force." The other two "Fundamental Forces," the "Strong and Weak Nuclear Forces" appear to be simply imaginative explanations which arise as justification for the idea that neutrons exist, as such, in atomic nuclei. A much simpler explanation appears if one considers atomic nuclei to be electron-proton aggregates in which a neutron has, at the best, potential existence. Einstein's frustration was apparently caused by his operating on sets of erroneous ideas.

In the next couple of paragraphs will appear a statement, which Einstein could have published, a logical outgrowth of Planck's ideas, Which might have kept us from almost a century of what this writer considers "semi-mystical nonsense" in scientific theory.

"Let us assume as a working hypothesis that there exists a 'dot matrix' of separable oscillators. These, in turn are collected to form a 'substance' at its 'triple-point,' of larger separable oscillator entities capable of correlating motion and of separation into the electron-anti-electron set and distortion into neutrons." Amplifications of the ideas in this statement, and corollaries, can give explanations for electrons, protons, the expanding universe, "The Big Bang" and almost any other phenomenon to which it has been applied. It is this working hypothesis which has led to the explanations of "Mass" and "Energy" which have been used throughout this paper.

Why was Einstein right? When he was, it was almost as much luck as brilliance. The hidden implications of the mathematics which matched reality made the theorizing seem to fit even when the basic ideas erred. Had he gone in a different direction, following up the ideas of Max Planck, he might have reached the same basic conclusions as the "Oscillator Substance Model" which has arrived nearly a century late, and will probably be ignored.

Post Script: Although this writer finds the Oscillator Substance approach so natural and useful as to feel that it should be common knowledge, the discovery of this possible "Explanation of Everything" is only a few months old. The ideas may wait some years longer for confirmation or disproof as what information published about it, thus far, is almost exclusively on Helium.com. and the discoverer has no professional standing as a member of any research institution or group. It is sad that a young, patent clerk could not have reached these ideas in the early 1900's rather than a very elderly janitor being the discoverer a century later....

Now, if a certain "String Theorist" were to have happened to have come up with this... Oh, well, we can't have a perfect world!

Einstein was very right to try to explain the workings of reality, it's sad that he made a few key mistakes.

***Spelling corrections made. Appologies for 3rd, try!
But vital that the word 'strings' is NOT stings!

Hello ESKI,
It's me again... Sorry for the epistle! But just to say...

In relation to Einstein and the 'dot theory' plus 'infinity' these
terms are simply used as the only example equation which make some
sense of a greater mass than has even entered into any earth
vocabulary yet. So therefore are limited to explain. But still truth
between all, if you can read between the lines.

I believe in my 'Double the Speed of Light' mentioned, 'the Vacuum'
and
the 'Energy' drawn from all around, we may not see with the naked
eye,
so it might 'appear' empty, or even a bit fallacious to the
uninitiated. Yet
is FULL of the energies which can be utilized. One could call this
mass energy the dot matrix. Whatever terms are used they are only
words
to try and explain such Forces all tied up together.

It is only natural with the Universe still being an unknown quantity
of Space Time Dimension that the term Infinite must be used, for that
is where we all stand within this matter. The fact that the Mass
Energy's Essence is still Light - electromagnetic or otherwise - dots
or waves, black or white, it is all a part of the One. The One of
everything which could not be dissected to many, if it was not all
linked in the first place.

We who have this interest in our different scientific approaches, have
all needed people like those gone before. Some need to feed off,
approve or disapprove, and all add our bit to the extensions made.
Einstein was in truth like many, who never intended so much to become
what it has, and yet opened doors for others who never thought to walk
through; to find out for themselves what he believed 'to be'.

Whether Einstein or Plank or anybody else, theories which remain theories until proven as even supposed to be facts, still will have more seemingly hidden - or rather unknowns - because the Matrix of all things is not a rigid Science but as malleable as pure gold. The Essence of Life which even Radioactivity can tell you it has a life-span, is still born out of Light. We are only now holding the puppet 'strings' (string theory,) of this and not yet seeing the fullness in the Oneness of it's Velocity in which it moves through Time. While we - the specks - are still trying to link the dots, in the vacume of our lack of knowledge, of how.

Best I stop here, or this should be posted as another 'discussion' which hasn't even begun, rather than as a reply to you. Don't give up when you know within yourself, what others are still learning. Nor before you have the conclusion to pass on. This O/S Site is Oscillating with all you need to get out of you, and congratulations with making it so far with SciScoop. Sometimes I have to mark time with time rather than blow too many brains... yet! Being burnt at the stakes once was enough... I have to Live this time!

Regards for now,
ka-sala

I happened into the new version of SciScoop yesterday and happened upon a bit by some person who goes by Barak who said some rather negative-- to say the least--about Doc's post re "Why Einstein Was Right. " I couldn't resist answering part of his little rant.... (I suspect that Barak may be perhaps a college Sophomore who's read a physics book once and thinks he knows every thing.... Anyway, I'm tacking my answer on here. Another view, and a contrast, but certainly not conflict to what Ka-Sala had to say. Yeah, I'm still around, come out of my shell once in a while....

Answer to Barak

To say that Dr. S's Energy Expression, $(vm^2)/2$ is not a type of energy expression because the units do not seem to match, is probably much like saying, "That is not a leopard, I cannot see any spots." It may also fall into the category of saying, "A bonobo is a Chimpanzee. take a good look at one. " The spots of melanistic leopards can be seen only if light happens to strike them at the right angles and there is a good deal of DNA evidence that either Bonobos (also known as the "Pygmy Chimpanzee of Zaire) should be classified as in Genus Homo, or humans should be classified in Genus Pan. In mathematics and physics, as well as in biology, appearances and labels may be deceiving.

Doc's contention is that both $(mv^2)/2$ and $(vm^2)/2$ are "energy expressions" since both arise from legitimate, alternate ways of integrating the momentum equation, $mv=p=vm$. He also notes in one paper, that one can also integrate "p" as an entirety to obtain the expression, $(p^2)/2$. which when we insert the original "mv=p=vm" fact, gives us $(m^2 \times v^2)/2$. Here in lies the key to the reason that the two energy expressions differ in form. In the process of integration, one of the variables was "held constant," that is taken out of real consideration except as a "scalar number" in the process. However, it is still a variable, a vector quantity which should be included in the result. The true descriptor for both energy expression should be the one found when "p" was integrated as a unit and the definition of "p" reinserted. In the cgs system the true units of what is going on when we talk about the motion energy of a unit would be $(g^2 cm^2)/2$ or mass times the "conventional energy

expression" or velocity times "Doc's expression." Looked at either way the concepts of mass, energy and velocity are inter-tangled.

As the energy, or motion content, of a moving body in a medium of which it is part--assuming here the the Oscillator/Substance Model is probably valid--will consist of two parts, the vibrational-rotational motions within the unit, and the motion disturbances caused by the motion of the entire body along a line, there may well be two "Energy Expressions" of the same form but actually arising from different views of momentum because of the two differing types of motions involved. If we assume this to be true, the total motion content i.e. energy would be $2(m^2 \times v^2)/2$, which equals $(m^2 \times v^2)$. Evaluating this at the Speed of Light, whether it be a limit or an average would then give the expression, $m^2 \times c^2$ for the Energy content of a particle rather than the mc^2 value usually accepted.

Taking this even farther from the fact that the Absolute Values of variables can be interchanged when they are related by an equation of the type, $xy=K=yx$, one can postulate that the maximum motion content possible of a particle moving at the Speed of Light would be c^4 or about $8.1 \times 10^{41} (g^2 \times cm^2)/sec.^2$.

P.S. I think that I'll drop this in the "papers" also. hv

One may define an Iso-set as the set of all structures that may be formed from a given number of electrons and protons. In this type of definition, "Iso-set-1,0" would be the electron, Iso-set-0,1, the proton, the Iso-set-1,1 would have three characterized members, the subset, $\{e, p\}$, the neutron, and the Hydrogen atom. Iso-set-2,1 would include, $\{e, e, p\}$; "eep" (a central aggregate), and Hydride ion}. The "2,2" set includes the H:H molecule and the Deuterium Atom, an unspecified, as yet, central aggregate, and all possible combinations of previous sets.

As each set contains all possible combinations of smaller sets, this becomes complex very rapidly and may seem so obvious as to be trivial. However, one interesting observation arises. In any given set there is a possible central aggregate of all the units of the set, an "Iso-set Aggregate," an "Iso-A." which would be the "Residence" of the highest "mass/energy" states of the set and would have all of the electrons confined within, or very closely associated to, the volume defined by the motions of the protons.

Any Iso-A set would have within it the potential to decompose to any combination of units of smaller sets and would be thermodynamically unstable with respect to such decomposition. Collapse to an electron (the Iso-A of "set-1,0) and a cation) accounts for many radioactive transformations, e.g. neutron [Iso-A of set-1,1 (?)], to a proton and electron. All other Beta-particle radioactivity can be explained similarly. An atom reaches an isomeric Iso-A state which does not revert to the original atom but to a cation by loss of an electron. A similar argument holds for the Alpha-emitters, except that the unit left behind is a di-anion... The Iso-A explanation can be extended to all nuclear transforms with appropriate modification of what is seen to be happening. Positron emission would involve interaction with Iso-set-0,0. The parent set considered pervasive which contains a "zerotron" unit splittable by "pair-production" into a proton and electron.

One notes that Iso-As of neutral units, atoms and molecules could be considered as "poly-neutrons" a term that has appeared in the literature. If it be taken that this means, "units that may be considered as 'polymers of neutrons' within which the neutrons have no individual identity" the writer has little objection to the nomenclature. The Iso-A concept simply includes these and any other central aggregate units, charged or uncharged which can be considered. Iso-As of huge sets may well be what are known as "neutron stars" and Quasars which are probably the "Isotope Factories of the Universe."

An Iso-A intermediate formed from the Deuterium molecule which, under certain circumstances, transforms to another version which would account for the most commonly observed CMNS transformation. CMNS is short for "Condensed Matter Nuclear Science which covers the area once known as "Cold Fusion" and other phenomena in the border land between "nuclear science" and molecular and atomic chemistry.

Iso-A intermediates might be interesting to consider in much of CMNS work. As noted above, they would be considered as the ultimate "Condensed Matter" of any given set of electrons and protons.

"...the atom of truth could only win."

Welcome Major Ray.

Would love to see a discussion here from you. You have a lot up your sleeve and you are far from alone in your beliefs.

I had a scan of your BIOS and as I have been a fly on the wall of the Academy of Future Science since the 70's - I prefer to remain out of the lime-light of so much - but was asked by ESKI, the Oscillation/Substance Theory, to join.

Anyway...

This is just a welcome hello, and would like to see anything you can post in this Group?

I cannot boast of scientific jargon/terms, yet I do know what I am saying! Though most seems to come through in a mix of terms in English, it doesn't change the facts.

Best regards,
ka-sala

OLD DATA/NEW MODEL

Reversing the century old interpretation of the Michelson-Morley Experiment and renaming Planck's Constant from a "Constant of Action" to the equivalent, "Constant of Angular Momentum," leads to a new model of existence.

The Michelson-Morley Experiment showed that the Speed of Light, "c," was a Constant (as nearly as could be determined) of Nature.

The interpretation that was given to this--Albert Einstein seems to have been a major proponent of the view--was that this fact proved that the "Aether," the all-pervasive something thought to be everywhere, does not exist-- or at least could be ignored as an idea. It was sufficient to consider that light waves simply pass through empty space at the fastest possible speed at which anything can move. This view seems to be accepted by the scientific community to this day.

An alternative, almost totally reversed, interpretation goes something like this:

The Michelson-Morley Experiment defined the maximum speed at which information is carried in the "Aether," whatever it may be. It, also, showed that the "Aether" can act as if it were a solid, carrying the transverse wave disturbances which we understand as "light."

Never considered at that time, and, apparently not in theorizing to this day is the fact that the maximum speed of information transfer from a point can be shown to be the average speed in any direction of the motion of the information carriers, whether these carriers be Pony Express Riders or Electromagnetic Waves. Considering this, "c," the Speed of Light, would be the average velocity, measured in any direction, of the motions pertinent to the carrying of information. It is not a maximum limit of velocity.

In that era of theory development, Max Planck, a genius contemporary of Einstein worked out his famous relationship between the frequency of light waves and "Energy." The result is well known, the equation, "Energy equals Planck's Constant times the frequency. That is $E=hu$." E can be expressed in "Ergs" with, "h," the constant, in Erg-seconds, and u, "Nu," in cycles per second. Erg-seconds is called "Action" and Planck called his constant the "Constant of Action." Although action has the same dimensions as "Angular Momentum," this fact was ignored. Had Planck called his constant the "Angular Momentum Constant"-- which would have emphasized a rotatory aspect to Energy and Wave Motion--scientific theory might well have developed in a totally different direction.

If we take Planck's Constant as being an Angular Momentum Constant of Nature and equate it to the definition of angular momentum, "Mass times radius of the rotor times the velocity of the rotor measured at the outer edge ("tangentially"). we obtain the equation, $h=mrv$." Since this constant applies for the movement of Information/Energy at the speed of light, "c," it makes sense to evaluate this at the velocity, "c." Doing this produces the equation, $h=mc$," which can be rearranged to $mv=h/c$." This valuable little equation defines "h/c" as a "Torque Constant of Nature." What more it discloses will be explained shortly. Applying a simple mathematical principle to the above leads to a new Model of Existence.

Any equation in two unknowns of the form, $xy=K$," two unknowns multiplied together equals a constant," can be rewritten in the form, $AxBy=K=BxAy$. That is the values of the "coefficients" of the units of the variables can be interchanged to give a valid statement. In this form, this little mathematical equation has much use in physics, It is the Law of Levers, the Law of Balance, the Law of Forces, and can be used as a defining statement for the Limits of an Oscillator,,,, Noting this use in Oscillator Definition, we see that the equation, $mr=h/c$," is an equation of the type discussed above; and, therefore, can be considered to be the defining equation for a family set of constant torque oscillators, $\{mr=h/c\}$, with a torque of "h/c" and an average "size" at the value wherein the 'Absolute Values" of mass and radius are equal. That is, when $m = r = (h/c)^{0.5}$..[Note: 4.7×10^{-19} is the value, to two significant figures, found when $(h/c)^{0.5}$ is evaluated in "cgs" units. }

By re-interpreting the Michelson-Morley Results and taking an alternative view of Planck's Constant, we have come to an alternative model of existence as within a something, "Aether," consisting of rotating units, which are--or are organized into--oscillators of the family set, $\{mr=h/c\}$. We have found an average value for these oscillators and, have found a mathematically defined "dimension," previously unreported, which would apply to all of these oscillators, this would be the "dimension" of masses greater than 4.7×10^{-19} g. and radii less than 4.7×10^{-19} cm.

One major question remains about this as a model. How can the "Aether" act as a solid? A look at chemical theory answers this question. If the "Aether" be considered to be a substance at its triple point--where it can be solid, liquid or gas--this problem disappears. We have a model, therefore, which may be called and "Oscillator/Substance Model."

There is an open membership web site, <http://groups.google.com/group/oscillatorsubstance-theory> set up to explore, elaborate, and/or refute the implications of this model.

Follow-ups on this model give some potentially quite useful and informative views on a number of topics. Here are some examples:

Law of Forces (Equal and Opposite)--Balanced pressures. Also, mathematically, as above,
 $A_x B_y = K = A_y B_x$.

Force of Gravity--Not a true force, an observational fact explained by differential pressures, even if it can be, and is, handled mathematically as an "attraction."

Mass--Balanced pressures/tensions at a surface.

Negative and Positive Charges--Result of counter-clockwise and clockwise spins of "stable" vortex oscillators/oscillations in the "Substance." usually the electron or proton.

Electron--Counter-clockwise-spinning, inverting-vortex oscillator/oscillation having oscillation limits of 9.11×10^{-28} g. at 2.43×10^{-10} cm. and 2.43×10^{-10} g/ at 9.11×10^{-28} cm.

Proton--Clockwise-spinning, inverting-vortex oscillator/oscillation having oscillation limits of 1.67×10^{-24} g. at 1.32×10^{-13} cm.
and 1.32×10^{-13} g. at 1.67×10^{-24} cm.

Electron-anti-electron annihilation--Combination of these two vortex oscillators of opposite rotation but otherwise identical characteristics into a spherical, pulsating oscillator, having the same mass and size limits as either of the "halves." (This was dubbed by this writer, "zerotron." See article, "Negatron plus Positron Equals "Zerotron?")

Pair-production--Reversal of above process....

The "Big Bang--" The instant of inversion--or splitting--of an oscillator creating a Universe/Anti-Universe Set. Neutrons being created on "our" side, which collapse to electrons and protons....

"Zerotron--" A hypothetical spherical oscillator, probably ubiquitous to the "Substance," which is splittable to electron-anti-electron pair and deformable to the neutron and/or anti-neutron....

The above are some of the definitions/explanations which develop easily from this model, some of which do not seem to arise from any other model. It is hoped that despite its proletarian birth from re-interpreting old data from a different view, people in the scientific community will give it a chance to prove its worth--or lack there of--without simply dismissing it "out of hand."

This little article is a simple version of the origin of the Oscillator/Substance Model, written to be submitted to SciScoop as sort of a prequel to some of the other article which I have published there.

The Oscillators

Reanalysis of the possible significance of the speed of light and of its relationship to "Energy" through Planck's constant has led to the idea that it is possible that all of existence is within a "substance" which consists of oscillators of a family defined by the equation, $m \times r = h/c$. These would have a constant torque of h/c and an "average size" of $(h/c)^{0.5}$.

Further consideration of how the electron, proton and neutron and neutrinos would fit into this pattern has led to additional conclusions. If the model is valid there should be neutral entities, which for convenience have been dubbed the "zerotron" and "zeroino" as respectively, "neutral" oscillator units which can be divided, respectively, into the electron/anti-electron pair, and into the neutrino/anti-neutrino pair. The zerotron, also, would be distortable into the neutron, which decays, in our universe, to a proton and an electron. By analogy, one can suspect that a "zeroino" entity would be distortable to a neutron-like entity, hence there may be three types of "neutrinos" corresponding to the electron anti-electron and proton.

The differentiation between particles and their anti-particles appears to be direction of rotation, with the electron and anti-electron this appears to be a clock-wise, counter-clockwise situation. It is said that the neutrino-anti-neutrino situation is one of spin in the direction of travel, the other a spin the the reverse direction of forward motion.

The charge state of the electron and proton can be related to their physical spin. Spin in a clockwise direction related to what we call a "negative charge," and spin in a counter-clockwise direction related to a positive charge, or vice versa. since an electron forms a bubble chamber track in a counter-clockwise fashion, it is probable that the electron's inherent spin is actually counter-clockwise.

The apparently defining equation for the oscillators of our universe, as noted above, appears to be $m \times r = h/c = r \times m$. That is the absolute values of radius and mass are interchangeable to define the limits. One might also say that they are interchangeable to define the instantaneous "positions" of the parts of the oscillator as the two components of the oscillator will apparently always balance across a line (through a circle ?) in the case of the vortex-form oscillators or against a sphere in the case of the neutral oscillators. The vortex oscillators can be envisioned as consisting of two coupled parts operating 180 degrees out of phase so that the maximum value of one corresponds to the minimum value of the other and each of these corresponds to the value $(h/c)^{0.5}$. One of the oscillators operating in the region of radius greater and mass lesser than this value, the other operating in the converse region of mass greater than the above value and the radius smaller. The greater volume, lesser mass region appears to be the region in which our scientists can measure "rest mass" and "radius." The radius being known in the literature of science as the "Compton Wave Length Value."

As the neutral oscillators have to be considered hypothetical at this moment, with the exception of the neutron, one can only make a hypothesis as to their motions. The most logical hypothesis is that they do an internal-external motion of pulsation against an internal sphere of $(h/c)^{0.5}$. The effect being of an inversion at that value. A third, neutral form can be envisioned as two counter-rotating halves. This type would be expected to be easily split into the vortex ("charged") forms.

[It may be noted that, atomic species would be considered as neutral combinations of oscillators, and, perhaps the Hydrogen I atom could be profitably analyzed as a neutral oscillator or, perhaps more accurately, as a combination of the two oscillators, the electron and proton. The neutron would be possibly analyzable as such. also]

It may also be postulated that the common form of oscillator may well be a "zerotron" which is made up in turn of "zeroinos" and containing at its center a "controlling" zeroino oscillator. All of this is hypothesis. It is possible that someone could do computer modelling on a similar type of structure with a simpler oscillator structure. That is, were one a good enough programmer it would seem possible to develop a computer program which would mimic our oscillator-substance models of the electron, proton neutron and "zero-tron" with simpler units and structures. Perhaps the oscillators could fit the equation, $yz = K = zy$, with initial y and z equal to 4 and 1 and K equal to 4 so that the point of reflection would be $y=z=2$. What do you think ? Is this feasible?

We can analyze the proton in the same way to obtain the values:

Our observations--minimal mass, maximal radius-- 1.67264×10^{-24} g. and 1.321401×10^{-13} cm. ;
balanced by

the other limit of maximal mass, minimal radius-- 1.321401×10^{-13} g. and 1.67264×10^{-24} cm.

It is to be noted that the electron is both heavier and lighter than the proton and larger and smaller, depending upon where the observation be taken. At the average values they are the same, as are all oscillators of this family. The logic is, as follows:

The Electron and Proton as Oscillators

If it be taken that the relationship between energy and electromagnetic radiation be a fundamental relationship of our universe, then examination of that relationship should furnish clues as to the nature of our universe.

If Planck's Constant, the constant which relates energy to electromagnetic radiation be equated to its definition as an angular momentum, one obtains the equation, $m \times r \times v = h$. Evaluating this at "c," the speed of light, we obtain, $mrc=h$ which can be rearranged to $mr=h/c$.

As any equation of the form $xy=K$ can be taken to describe an oscillator, by writing it in the form, $xy=K=yx$, to emphasize the interchangeability of the values of the two variables, we can see that the equation, $mr=h/c$, can be taken to define a family of oscillators of constant torque, h/c .

When the electron is checked to see if it fits into this family, it is found to fit with one limit set with the "rest mass" as the mass, "m", and the "Compton wavelength" as the radius, "r." For an oscillator the absolute values can be switched to determine what the other limit is. For this particular oscillator, the other oscillatory limit would be absolute value of Compton Wavelength as mass and the absolute value of the "rest mass" as the value of the radius, "r."

The most consistent set of values seems to be cgs, so the following are what is obtained as the vibratory limits of the electron:

Noted in our Universe as "Rest Mass" and "Compton Wave Length" are, (Six significant figures)

9.10953×10^{-28} g. for the mass, correlated to 2.42631×10^{-10} cm.

The other oscillatory limit would be 2.43631×10^{-10} g. correlated to 9.10953×10^{-28} cm.

What we have discovered, if the mathematics above accurately reflect the "real world," is that what we are observing is a situation of minimal mass and maximal size of the electron which is "balanced" in what we might call something like an alternate reality, by a maximal mass and minimal size. We have also found an average size for all oscillators of this family of $(h/c)^{0.5}$. This is approximately 4.7×10^{-19} cm. radius and 4.7×10^{-19} grams.

As there is recent literature observation that the electron, and, presumably also, the proton, turn 720 degrees to return to their original states, it seems sensible to consider these entities as "vortexes" which invert once per rotation, hence 720 degrees to return to the original orientation.

It can be seen that the application of the mathematical concept that any set of unknowns, $xyz...n = K = n...zyx$ can be said to define an oscillator situation in as many dimensions as one wishes to use, can have interesting implications. In this case the implication is that we possibly exist in a universe of a substance made up of oscillators of the constant torque family, h/c

Since this page was first written, the writer has been considering the probable internal structure of the proton and electron. It is very likely that both can be considered as combination oscillators with one oscillator operating between minimal size /maximal mass and the 4.7×10^{-19} limits and the other operating between the maximal size/minimal mass limits and the "4.7;" inversion.

It also can be noted that both the electron and proton would show "nodes" at the oscillation limits and at the central inversion "equator." it seems possible that the Quarks, considered fundamental particles in Standard Model are observational phenomena due to this quality of these two particles, and the interaction of the internal structure of electrons with that of the proton and other "particles."

An internet, group has been set up to explore, amplify, elucidate, or refute the implications of the above ideas. Its "URL" is <http://groups.google.com/group/oscillatorsubstance-theory>.

Re: Dr. Margulis' Penetrating Ether Theory.

Scanning this material more closely , it appears that we have a far simpler and more comprehensive view. The point in common seems to be the acceptance of a pervasive substance. However, Margulis does not characterize it as a substance; hence, misses most of the results of that acceptance. Additionally, Dr. Margulis attempts to preserve a good deal of material which we would find superfluous,

The description of the electron as a Mobius band is interesting. the motion of a given particle in a simple oscillator would follow what might be called a form of Mobius Strip and the motions of electrons (and protons ?) in their interactions would follow patterns that may be related to the Mobius Strip concept and to the corresponding Bottle, the name of which I have forgotten.

If one makes a big Mobius Strip and then starts slicing it down the midline one gets an interesting situation. The first slice gives a twice as long, twice as twisted strip. Slicing that one, however, gives two interpenetrating strips. Slice each of these gives 4 interpenetrating strips. That is each one slice of the previous unit produces another whole "one" unit as the resulting units all interpenetrate, but the complexity increases by some large factor each time.....This observation may have some pertinence to atomic structure.

It is interesting to see what others are doing. As you can tell, Dr. Margulis just posted this material. I am impressed by the amount of work and thought, that has undoubtedly gone into the production of this, but, unfortunately, I don't see the result as being of a lot of use...Eski .

ON THE MATTER OF ANTI-MATTER, What is hidden where?

The writer, noting a "Hidden-half-of-existence" below a radius of 4.7×10^{-19} cm., and the possible creation of alternate universes resolves the 'lost anti-matter problem of our universe " to his own satisfaction.

Re: Matter and Anti-matter.

Every one has heard of Matter and Anti-matter. Matter is made up of electrons and protons and anti-matter is made up of anti-electrons and anti-protons. When anti-matter and matter come together to meet they mutually annihilate to form pure energy. That is the commonly accepted picture. The reality may be not quite that simple, and, possibly, more interesting.

There is a distinction in science between something which is dubbed "Matter" and "Anti-matter." Matter is made up--for the most part-- of electrons and protons while anti-matter would consist of the corresponding "anti-particles." There seems to be a problem, however, as to whether anyone has actually observed an anti-matter atom or molecule. The writer does not personally know of any reports of anti-Hydrogen or anti-Helium, etc. There is a rather extensive writeup available on the Internet of a theory called "Dominion Cosmology" which does a quite logical development of a Cosmology based on the premise that matter and anti-matter have a property of mutual repulsion. There is, also, an interesting 2006 news release that the "Beta sub 2" particle vibrates (oscillates) between matter and anti-matter.

Let us look at the whole problem of "The Lost Anti-Matter of Our Universe." from the viewpoint of the Oscillator/Substance Model.

[For those who are unfamiliar with the O/S model, the following short introduction is given. O/S Model postulates existence as within a substance at/near its triple point, which is made up of (or organized into) oscillators /oscillations defined by the family set, $\{m \times r = h/c = r \times m\}$. That is, they--the organizational units--have a constant torque of h/c , Planck's Constant divided by the speed of light, and since the absolute values of m and r are interchangeable, and at an average value would be equal to each other and to

^{0.5}
(h/c)⁰, all of these oscillators can be considered to invert through values of about 4.7×10^{-19} g. at 4.7×10^{-19} cm.]

If the "O/S" Model be valid, the problem of Matter/Anti-matter, is tied closely to the presence of oscillators as the organisational units of reality.

Oscillators/oscillations within a substance can be classified into three general categories. (At least, that is the way this writer classifies them.) All three categories will appear as disturbances of a spherical form, but their "motion senses" will be different.

The simplest category, which we shall call a Type 1 Oscillator would be a true sphere, inverting through an inner sphere-- in our Model, the inner sphere would be as defined above--from an outer limit of maximal size and minimal measurable "mass," and an inner limit, also a sphere of minimal size and maximum "mass."

[Size is easy to understand. Mass, however, does not ever seem to have been given any true definition. As used here it will mean the pressure/tension between an entity and the rest of the "Substance of Existence" as measured at a point on the boundary between the entity and the "Rest." The more the concentration of motion within a space, the larger will be the measured mass. For a Type I Oscillator, indeed for any of the oscillators, the smallest mass would be corresponding to the largest size, and these would be the values which will be found in our "Reality," if they can be measured. It appears that most Type I Oscillators may go totally undetected.]

A Type 2 Oscillator could be called a "Toroidal Pseudo-Sphere." The total space occupied would be spherical, but the sphere would have, at any given instant, an axis of rotation and an equator. This type would invert through a circle rather than a sphere, and can, with sufficient motion content added to it develop counter rotating halves and, eventually, spit into two Type 3 oscillators

Type 3 oscillators would be always be formed in pairs having opposite senses of rotation/pulsation (inversion). The best known of these sets are the negatron-positron pair, also known as the electron and anti-electron. Type three oscillators because of their effects in the Substance being opposites are known as "charged particles." Here is where the matter/ anti-matter concept arise. A unit of once rotation/inversion pattern is the negative charge, the

reversed pattern is the positive charge. If the two patterns are of the same oscillation limits, they can rejoin with loss of energy in what is known as "annihilation." If, however, the oscillation limits are different, the two units may associate in many ways, but, do not rejoin to form a Class I or Class II oscillator/oscillation. In our universe, we have an observed unit, the neutron, which splits into "halves" which are not identical, these halves, the proton and electron can associate to form many things, but do not rejoin to the neutron, nor can they rejoin to what one may call a "zerotron," a unit which can be postulated as a Class I oscillator which can be split to an electron/anti-electron pair or deformed into a neutron which then splits into an electron and a proton.

The proton and electron are considered as matter particles as they have apparently indefinite lifetimes in our Universe. The reversed particles would be anti-matter, having indefinite lifetime in an alternate universe having some reversed sense. In O/S thinking, our universes has one rotation/pulsation orientation which is compatible with the rotation/pulsation orientations of the electron and proton. At the instant of inversion, or splitting, wherein our Universe emerged there would have been a complementary Anti-Universe also emerge. This can be used as one explanation for the lack of observation of "Anti-Matter" in our Universe. This, in the main is very possibly correct. However, there is another explanation. It may well be that the idea of Matter/Anti-matter is an over simplification, and that, in essence, the halves of nature exist in both universes.

It, also, may be noted that the idea that matter and anti-matter will annihilate on contact may be in error. If matter and antimatter more complex than the simplest opposites, were to be formed in our Universe there would be slight differences due to orientation to the rotational characteristics of our universe, the exact "orientation fit" necessary for the "Yin-Yang" rejoining necessary for "annihilation" might be difficult. It is known that the positron-negatron pair exists for a period of time as a "Hydrogen type molecule" before combining with loss of energy.

Incidentally, it may also be noted that the usual statement that there are two photons emitted at 180 degrees" seems a misapprehension to this writer. A point radiator will radiate one pulse in a spherical pattern. In the case of the "annihilation" recombination, what would be emitted would be one pulse, "photon" at 360 degrees. It could be detected as "two photons at 180 degrees," but this would actually be only one "energy" pulse.

UNIVERSES WITHIN UNIVERSES

The discovery that evaluating Planck's Constant as an angular momentum at the speed of light leads to the mathematical definition of a "constant torque universe of torque, h/c " (Planck's constant divided by the speed of light) leads to speculation about universes within universes.

The "Universe" defined by the set-equation, $\{m \times r = h/c\}$, mass times radius equals Planck's Constant divided by the speed of light, defines a "family of oscillators" having a constant torque of h/c and an average value of $(h/c)^{0.5}$. As a constant on nature divided by another is also a constant of nature. we can say that both of these values are "constants of nature." So also would be $(h/c)^0$, $(h/c)^{+2}$, $(h/c)^{+1.5}$, etc.

What develops here is the problem that if, $(h/c)^{0.5}$ is the average value of an oscillator family defined by (h/c) ; then, (h/c) could be the average value of an oscillator family defined by $(h/c)^2$, and so on. That is, every possible power or root of the ratio could be taken to define another "oscillator family" and hence another "Dimension."

This problem of dimensions within dimensions seems somewhat related to two mysterious numbers of our number system. The numbers "zero," and "one." We say, "Zero is nothing." That, however, is not totally logical, by giving the "number," Zero, a name and a place, it has become something. It can be considered a starting point, a hole, even an entrance into another dimension. In another article dealing with signed numbers,* this writer has discussed the meaning of signed numbers as representing on a three dimensional chart, first a line in a given direction, then a square defined by two directions and third a cube, defined by three dimensions/directions. This writer did not go on to what would have to happen after that. Logically, one can pick a point at which to go on from some given three dimensional cube and move the new origin to that cube, then start the convention over. The first line-up would form a line of these cubes, next change would form a square of these cubes, the next a cube of these cubes and so-on. However, it may be noted that by moving our origin spot, our "zero" to a particular cube, we have made the "dots" in our next diagram be the 3-D cubes of the last diagram. Our new "Zero" is an origin dot, but it is also the cube of the last origin dot. We have taken, in a sense, $1 \times 1 \times 1 \times 0$ and gotten 1^3 , which is our new "Zero" but is certainly not "Nothing...." It, in fact, could be considered the "hole" from which are pulling out the "3-D" dots from our previous "dimension. "

Another little experiment with "Zero" and "one" also brings in the mysterious number, "Infinity," the "number beyond all numbers," which in practical terms is the next number beyond where we stop counting, for whatever reason. If one forms a "Möbius Strip" by twisting a strip of material one turn and fastening the ends together one obtains a "uni-dimensional infinity," that is, it is possible to go around and around, outside and inside, passing through the same points indefinitely. This strip is both "Zero" and "One" as it is our starting point, and it is one unit.

Now if the one unit be cut by one knife or scissors, one time once around, passing once through the starting point of the cut, what is obtained is still one unit; which, however, is twice as long as the original and twice as twisted. We have run a number of "ones" together to still get "one" but it is no longer the same "one." Continuing by splitting this unit, one obtains, not as might be expected--a longer, more twisted continuous unit--but two intersecting units. As they intersect, they are still "one." Continuing the slitting process produces more and more of the intersecting units, still "one" as they are "attached" to one another by the intersections. We have been always operating on one unit at a time one operation at a time, but we have created many "ones." We reach, "infinity" when we no longer have enough material in each unit to split with our knife. Infinity begins at the point where our "instrumentation" fail.

Since we can set h/c as the basic unit, we could call it the "one" and let $h/c=1$ to develop some sort of "absolute scale." The interesting thing is that if we do this, since we consider all powers and roots of one as one, we will be defining all of our projected universes as "One."

Going over all of this, the writer feels that at this point, the one thing that should be done with this one article is to write one (.) (:>)

Deuterium molecular cation as a reaction intermediate. Dean L. Sinclair

http://docs.google.com/Doc?id=dc2474d_244d6tf5d9x

<http://groups.google.com/group/oscillatorsubstance-theory/deuterium-molecular-cation>

Consideration of the Deuterium to Helium transformation leads to the idea that the Deuterium Molecular Cation (also a free radical) would disproportionate to Molecular Deuterium and a Deuterium Di-cation. This species would be a space isomer of the Alpha particle and would be expected to collapse into that form, which then, of course, converts into Helium 4.

Writing this out in simplified, inorganic chemistry form, for the usual observation by electrolysis, we obtain the following steps:

1. Ionization $DOD \rightarrow D^+ + OD^-$

2. Electrolysis $D^+ + e \rightarrow D$.

3. Molecular cation generation

$D^+ + D \rightarrow DD^+$ or

$D + D \rightarrow D:D; D:D - e \rightarrow DD^+$

4. Disproportionation of the molecular cation

$DD^+ + DD^+ \rightarrow D:D + DD^{++}$

5. Internal rearrangement of DD^{++} to "Alpha particle" form.

6. "Ultra-slow-Alpha-particle" form picks up two electrons to become He4.

The idea that the first step of oxidation of Deuterium could produce a molecular cation suggests that what is actually happening in the electrolysis cells is a Redox reaction of the electrolysis products which are sequestered such that the oxidized and reduced units are separated... That is, the molecular cation, once formed will have a high probability of encountering another of its own kind before further oxidation takes place.... This explanation would also account for the long induction time, a sufficient quantity of Deuterium and Oxygen or Deuterium Peroxide would have to build up in different parts of the electrodes before the reaction initiated.

(This would seem to almost create a pulsing situation. Electrolysis products would build up to a point of the situation "reversin"--well, almost--with "Deutero-water" being regenerated along with Helium... or perhaps some sort of situation will develop where in the amount of electricity input is just enough to supply the DD which is converted to He....)

This view, if valid, suggests that it might be possible to construct a fuel cell which would convert Deuterium to Helium and produce heat.

It also appears possible that a Hydrogen molecular cation could possibly convert to a Deuterium cation. Although somewhat more difficult to conceptualize, the same general ideas for using a fuel cell of Hydrogen and Oxygen to produce Deuterium and heat rather than water would seem possible.

It would seem that someone in the cmns group would have the facilities to check out the fuel cell idea...

All of the above are noted as simple inorganic reactions. The collapse of the DD++ unit to its spacial isomer, the "Alpha" arrangement, would release a good deal of thermal energy but there is no reason to think that there would be any released radiation.

NOTE: The ideas that spark this come from the little known Oscillator/Substance Theory. In O/S view, there is no need for there to be neutrons in a nucleus, additionally there will always be a pressure toward symmetry.... Putting these two ideas together, the nucleus of a Deuterium Atom would consist primarily of two paired protons--ala "para-Hydrogen" only closer spaced--The molecular form would contain two such sets. Looked at this way, an Alpha particle would be a "square planar spinning array" which would have an up, down, up, down arrangement of protons, which would be identical in arrangement--but smaller in size and far more symmetric--than what would be expected of a DD++ unit; hence a DD++ unit would be expected to collapse to the far more stable space-isomer.

Second Note: As a once-upon-a-time, semi-expert on acid-base theory. I may have glossed over a very important point at step six above. The slow-Alpha would be a very strong Lewis Acid. In contact with Deuterium it would be expected to form a unit which would be a heliumdeuteride di-cation intermediate which would be expected to collapse into He4 and the Deuterium di-cation which would collapse to an "ultra-slow Alpha structure and continue the chain.... !

This raises a question as to what would be the effect of an Alpha emitter in Deuterium gas. Could it initiate a chain leading to more He4 than would be expected from the Alpha particles alone?

Elements, Periodic Chart and O/S

If the Oscillator/Substance concept of what are electrons and protons be valid, and electrons and protons are actually spinning vortices, with the size of the protons and their interactions accounting for the "nuclei" of the nuclear atom, then it is necessary to do a complete re-examination of the concepts of atoms, elements and the basis of the Periodic Chart of the Elements. A new reason/rationale need be developed for the apparent presence of "isotopes" which are conventionally explained by the presence of neutrons in atomic nuclei. If there be not neutrons, per se, in the nuclei, then what are the electron-proton interactions which explain a situation which will make it appear that there are stable neutron type associations.

Conventional wisdom says that there be pairing of electrons such that their "spins" will cancel. O/S would agree that a partial cancellation of the vortex motions would take place if two vortices were "paired, upside down to one another." The conventional literature, however, does not continue to apply the same idea to protons, nor does it seem to realize that an up-down-up-down chain or circle can be extended. It should be useful to consider the first few known proton-electron associations.

The simplest units which may be considered as proton-electron associations are the neutron and the Hydrogen atom, H1. The neutron may possibly be, or, at least can be thought of as, a tightly coupled dual oscillator of an electron and proton, "proto-electron/proto-proton,(?)" which when it "falls out of sync" collapses into an electron and a proton. These two can reunite into another unit which can synchronize in unlimited--or almost unlimited--spatial dimension, hence, cannot be "knocked out of sync" in the manner of its more restricted isomer, the neutron. This second unit is, of course, the H1 atom.

Perhaps the next easiest set of units to consider is what one might call "Iso-set--2,2," the set of units made up of two electrons and two protons. This would have also two members, the Deuterium Atom, "D," or, "H2," and the Hydrogen molecule, H:H. The Hydrogen molecule is known to have two forms known as "ortho-Hydrogen" and "para-Hydrogen" wherein the Hydrogen nuclei, ie, protons are "matched spin" or "paired-spins." that is the protons are moving in exactly the same orientation in one case and are "upside down to each other" in the more stable orientation. The Hydrogen molecule would be expected to be an ovoid. It is probable that the Deuterium atom could be considered as a condensed version of the "para-Hydrogen" molecule, containing much less vibrational energy. The close-coupling of the two protons in the nucleus and their probable containment, at any given instant within an electron, giving the illusion of a "nucleus" consisting of a proton and a neutron. It can be considered that the vibrational motions of the electron and the protons would be such that for very short periods, the proton/electron interactions would be such as to be identical to those of a neutron, however, the neutron as such would not exist....

The three electron, three proton set, "Iso-3. 3-set." has two well-known, atomic members, Tritium, "H3," and Helium 3, "He3." Tritium is "radioactive," spinning off an electron to form a cation which when it regains an electron becomes the isomeric He3. Tritium does not have a magnetic moment; therefore, it is not a "spinning neutral unit." This implies an internal symmetry, if the nucleus be composed of an inverting tetrahedral array, that is, three units inverting as if they were at corners of a tetrahedron, then this unit would on the average have no polarization, do "dipole" even though the internal units have inherent dipoles. It appears from the chemistry of this unit that, at any given instant the central array, the "atomic nucleus" is encased within a set of two coupled electrons with a third electron more loosely coupled.

The "stable" He3 unit is a totally different configuration. With a definite magnetic moment in the same sense as that of the neutron, but larger, it is a spinning "neutral" atom, with a definite dipole dominated by the spinning protons which would appear to be in a trigonal array corresponding on the atomic scale to the "resonance-stabilized" trigonals that are known in molecular chemistry. These three appear at any given instant to be tightly encased in the vibrational pattern of one electron and more loosely in the vibrations of two others.... This giving rise to the conventional idea of one neutron in the nucleus. Evanescent, transient states which would be identical to states of neutrons, would exist in both the Tritium and Helium3 units, as in all atoms, giving rise to the illusion of stable neutrons in nuclei.

In the "Iso-4,4-set," it is interesting to compare the molecular unit, Deuterium molecule, D:D, and its atomic isomer, the He4 atom. This has been covered in some detail in another short paper, "O/S Theory and the Deuterium to Helium4 Transform." The following paragraphs are essentially quoting from that paper.

The Deuterium Atom nucleus consists of two, "coupled-up-down" protons (in the most stable state) and the Deuterium Molecule would be two sets in what could be called a "stretched tetrahedral array" or possibly a "stretched square planar array," or an arrangement combining these two ideas. This set of "nuclei" would be surrounded, literally within and without, by an array of 4 electrons. The overall result being an ovoid with two distinct centers of motion.

The He4 nucleus would be composed of the same eight basic units; however, in this case the ovoid of two distinct centers of motion is compressed into a spheroid having but one center. It is possible that this spheroid would have a tetrahedral configuration of protons again surrounded within and without by a tetrahedral arrangement of electrons .

The Alpha particle would not be a He4 nucleus, but a square-planar (actually, circular) array of 4 coupled protons surrounded again, "within and without" by two electrons. The coupling of the protons giving the unit a very strong, clockwise? spin.

These "pictures" make sense if you look at the oscillator limits of the proton and the electron and the reversed spin/inversion senses which give rise to the "positive" and "negative" charges.

(The electron and proton by O/S logic have the same "average" mass and radius, but with very different oscillation limits, with the electron limits approximately "ten to the third" times those of the proton hence, with both having the same rotational/inversional velocity of "c" the proton does many inversion/rotations for each of those of the electron. The electron is, therefore, "heavier and lighter" and "larger and smaller" than the proton. The reader is also referred to the "page"
<http://groups.google.com/group/oscillatorsubstance-theory/web/the-electron-and-proton-as-oscillators>)]

It can be seen that the analysis of the entire periodic chart and corresponding molecular isomers could be an impossible task. It appears that nature is such that certain patterns arise of electron-proton interactions which lead to the Periodic Chart pattern with the use of "neutrons in the nucleus" as a convenient bookkeeping tool. This, however, has to be remembered, if one feels the O/S insights to be valid, is illusional, and can obscure other patterns of value. some of which can be found in use of the Iso-set, Iso-A, concepts covered, to some extent, in another article. "Iso-sets, a Key to Radioactivity." which can be found on SciScoop, and, also, as a page on the Google Group, Oscillator/Substance Theory.

(ABERDEEN AMERICAN NEWS - On line edition)

allAberdeen.net

Dear Sophie,

As my favourite heroine, I cannot resist trying to get you involved in some of my world. I think I owe it to you and to all the brilliant youngsters like you, to give you a chance to look at some ideas and see what you could add or change. I'm sure that with your razor sharp intelligence, you will understand immediately what it took this writer over five years to figure out, or 77 years if one wanted to look at it in another way....

Here's the situation. If one switches/reverses the interpretation of two sets of over a Century old data, one can put together the basis of a quite comprehensive "Theory of Existence," which seems to be able to be extended to account for almost everything, except, of course, the fact of "Existence."

Actually, what is done is to reverse the interpretation of the famous Michelson-Morley Experiment which determined the Speed of Light to be an apparent constant of nature, from proving that an "Aether," an all-pervasive something, does not exist, to the idea that it actually furnished information about that "Aether." The other switch is in the naming of Planck's Constant which connects the frequency of light to Energy, from a "Constant of Action" to the mathematically equivalent, "Constant of Angular Momentum."

The Speed of Light, as determined in the "M/M" Experiment, can be shown to be the maximum velocity of the carrier wave information in a medium. That it was the maximum velocity for information has always been known, but, it's significance has been ignored. The Maximum Velocity at which information can be carried from a point is the Average Speed of the Carriers in any given direction. The Speed of Light, then is not necessarily a limit, it is certainly an average. That is, if movement of information is the same in principle by electromagnetic radiation as by Pony Express. The "M/M" Experiment can be taken therefore to have determined a characteristic of the Aether, as being able to carry information by light waves as the Speed of

Light, "c," which is about 3×10^{10} cm./sec. Also, it showed that the "All-pervasive-substance," could act as a solid, in order to carry transverse waves. A moments consideration of a fact of chemistry leads to the conclusion that a substance at its triple point where it can be solid, liquid or gas on slight changes of pressure fits this very well. Also, as a substance at its triple point would have the nearest situation to a total equilibration of motions throughout, and would tend to revert to that situation, a solid at its triple point accounts for such things as the Law of Forces. For each and every force there is an equal and opposite force." One can paraphrase this, "In a substance at its triple point any disturbance will be compensated...."

There would always be motion in a substance. Planck's Constant as an Angular Momentum implies that an important part of that motion would be rotation as Angular Momentum is a characteristic of a rotating unit. If we set Planck's Constant, "h," equivalent to the definition of Angular Momentum, "Mass times radius times velocity," we can determine some characteristics of at least some of the substance. We write, $h = m \times r \times v$. Evaluating this at "c," and rearranging we get $m \times r = h/c$. Since mass times radius equals torque which is the push or pull on a rotating object, this makes sense. We have discovered the

"torque constant of nature."

Additionally since the equation can be fitted into the form $xy=K=yx$, which is among other things, the definition for an oscillator, we have discovered an equation defining an oscillator set, which we can write in set notation, $\{m \times r = h/c = r \times m\}$, which points out that the numerical values of mass and radius can be interchanged and at some point they will be equal at $m = r = (h/c)^{0.5}$. This last figure is about 4.7×10^{-19} cm. and 4.7×10^{-19} grams. We now have our substance made up, at least in part, of oscillators which invert through a constant value. We even have discovered an interior "dimension" to these oscillators that is smaller Than 10^{-18} cm. in diameter. This figure is the size of the hole into which string theorists say that their dimensions disappear and Quantum Mechanics is said to fail.

Checking published data for the electron and proton which are the basic units of all matter, we find that the Rest Mass and "Compton Wavelength" values fit as one set of limits, at the situation of maximum size and minimum mass, the switched Absolute Values define the balancing limit of maximum mass and minimum size....

We can go on from here with the implications of a substance at its triple point made up of oscillators of this family to develop an entire Theory of Existence. I'm sure, Sophie, that with your intelligence, in your world, you could get someone to listen to you and add, amplify, maybe even refute. If you can find use for any of the work this writer has done in your world, or you can find some way to help, you can have some of your contacts in my existence check [http:// groups.google.com/group/oscillatorsubstance-theory](http://groups.google.com/group/oscillatorsubstance-theory).

In my world there is too much information, too much "white noise" for anyone to hear anything. Scientists are too busy creating new data to re-examine old data for new significances....

Sophie, if any of this could help you to perhaps get a jump-start on a career as a scientist or a full-ride scholarship in college in your world, you're welcome. In my world, if noticed at all, it will probably be ignored as "Cracked Pottery."

Explaining the Universal Law of Physics - COMMON BOND

COMPLETE BOND

Explaining the Universal Law of Physics would be the Elemental Effect in which each and everything is Linked.

We could take the largest circumference of a circle in any given direction within the shape of a round ball - call everything within this a Complete Bond - then take everything out of it and divide it up into a finite number of particles, until we visibly see nothing left. Yet truth would be, that now we are left with the invisible empty space within where the circular ball exists. Does appearing to be void, mean absolutely empty just because this is how we see it?

So we start all over again, within the this space and shine a light within, only to find it is absolutely brimming with microscopic particles we definitely could not see without the light. Yet without this means, there is no way we can divide these particles up as we did right down to what we believed to be the last visible molecule prior to the use of the light.

We find in a different way, it is as full as when we first began to dissect all that was within. What we did not see in this dark inner space that it is literally oscillating with energetic particles. The best we could do to capture these now - being too small to dissect - is work out how to figuratively acquire these? Physics would require a Vacuum Effect to suction in this 'everything' we now see in the light; hopefully, zapping the lot.

Yet having done so, where to then? What can be done with these trapped microscopic molecules? Physics must as physics will, and explore each and everything it has captured; remembering these are not particles visible as an finite number of the Complete Bond found when we dissected the ball. These are infinitesimal left overs caught from within this seemingly emptiness; which somehow must have some connection. Otherwise the ball would be evacuated - absolutely empty - void of anything at all.

But wait a minute. Can anything be absolute void of anything? Does lack of particles in light mean absolutely nothing? Inside that circular ball of Common Bond, may now appear so, but just because we have vacuumed everything seen in the light out; does this seeming vacuum mean there is nothing? There is energy in everything; even in what appears to be a vacuum.

It is a known thing that afterthoughts are able to 'float' in a vacuum. If every molecule of anything oscillates, this means there is always movement. For even astronauts must practice if they wish to remain still. It is seen how even a drop of water moves 'differently' - one could call it any way and in slow motion - but it moves within this pressurized vacuum. Both the astronauts and anything else is said to be in an anti-gravity space.

Therefore there is an energy - like we need light to see the colors in

a bubble - yet a buoyancy within another form of travel. Something, must be creating this action. An oscillation of it's own as against another of their own, yet all bound within the Common Bond. It is no different within the bonding of any element; creating another; in the changing recipe book of the Cosmos in which we are even linked though our own Common Bond.

We are all bound to the exactness of whatever we and everything are meant to be. Whether we try to create rain though the use of different elemental mixtures, or snow through another in trial recipes of compounds. Right down to whether or not we use the chemistry of an egg or flour in a cake. What bonds as the best flavors gives rise to their success. The Law of the Universe is to naturally Link.

The Law of the Universe is that everything is utilized; and there is no waste. Everything has it's Positive and Negative Poles; and will Link to whichever is the Complete Bond of it's own Reason. Nothing is not permanently creating and recycling within their Common Bonds, at infinitum. Everything is being utilized with purpose and control.

The Universal Law is that physics, physically, is so often overlooked because that bond to which we each are a part, is overlooked. The Complete Bond is when we are included, for we - whatever creature - are as much bound up in the star-dust of the Cosmos - as is the Planet Earth on which we Live. We and everything oscillate within this One Common Bond, despite our differences.

Throughout most Subject Matter - so far written - it appears, despite whose or what Theory, I see a Common Bond running through this whole Program, but answers, still searching. Regardless of no 'equasions' in this, there is the Link between all who search in the O/S Theory. Maybe some-one could work on this one.

A look at Quantum Superposition, Atemporality and the direction of Entropy in relation to Eternity - INFINITE VARIABLES

Options

2 messages - [Collapse all](#) - [Report discussion as spam](#)

ka-sala [View profile](#)

[More options](#) Sep 19 2009, 7:28 am

In our Oscillation Theory, a lot has been said lately regarding Infinity. Directly of indirectly; we have been oscillating all around the subject of the O/S Theory. To get to where we want to be we must bring it back to the unified weak and electromagnetic interaction between elementary particles, including inta alia, the prediction of weak neutral current.

We have to return to the source of our search; see it for what it is, and go on from there. ie. A look at quantum superposition, atemporality and the direction of entropy in relation to eternity. We can go over and over Planck's Theory, and anyone else's. The difference is we are here... now. Today's Theory.

*** Please excuse any spelling mistakes. I would be very interested to have feedback on these two posts regarding the O/S Theory which Links all which has been covered to date.

Wishing you what you so desperately seek.
Ka-sala

INFINITE VARIABLES

This is like asking one such as a human, to stand on the point of a pin; take a step off, and simply hope we won't fall into the abyss of Eternity.

The quantum superposition if being so finite as to suppose we can take a minute step in such a diversity as the Infinite we call Eternity, is neither to know we are retreating or progressing. To literally make such an absolute turn around, with the knowledge that we will step back into chaos; is more than one giant step for man to handle. He has enough already to assemble in his own collective elements.

If this direction of entropy points with a definite sign-post (be it visible in such a universal science as the quantum's allow,) there has to be some-one who has been to Eternity and back to signify any measurement at all its physical science. Even quantum superposition would be that all the pieces of the jig-saw puzzle still missing, will automatically just fall into place as the elements should.

Hoping that each like a stepping stone - or giant quantum leap of certainty - our only amoebic particle of theoretical virtue will take our weight. Or carry us as a whips of quantum superposition back into a space time dimension of... are we there yet, or is there more to come? The place called atemporality, or timeless.

Elements of the unknown all lie within the universe of each of us - within our sub atomic thermodynamic elementary and transitional particles - right through to the seeming chaos of decay. We shovel

every component required to keep us fueled to create an infinite layer of cells required to hold us in an overlay called skin. As long as the life-span of our own nuclear decay exists while in this superposable state called human, we will continue within our own field force.

So while on the pin-point of quantum superposition, instead of stepping off, we can use our own electromagnetic energy, vacuuming every quantumized oscillating molecule around us, to us. By doing so, we draw on all variable changes created via the quantum super positioning; propelling us by repulsion within an non moving vacuum.

Through this, we create from what was a seeming a state of entropy, a transverse tunnel in which we can now safely step off the pin. By turning matter back on itself from what would have been a physical phenomenon of universal conformity, it has been transformed into a usable state.

There is nothing in the universe called oscillating energy, which is not transferable, transitional, reversible, or any other attribute, which cannot be utilized when known how to superimpose. The atemporality is unaffected by the space time dimension of Eternity's Infinite variables.

The only unknown factor is the inconsistent knowledge yet, within our own field. The Cosmos it's Photons, and Electromagnetism is within each and every one of us. Why are we oscillating for so long over so many theories?

With an unlimited number of variables, the Universe that we know seems to have condensed down communication to constants which seem to be involved in those variables. The writer, "Eski," has spent a good deal of time working with two of them, the speed of light, otherwise, the maximum speed of communication, and Planck's Constant, which helps to define how that communication be carried. They combine into a universal torque constant, " h/c ". From this has developed a good deal of information about a possible organizational pattern of the Universe we know and of what it may exist within.

A new member of our group has referred us to his work in the unification of gravitational theorizing and electromagnetism. His ideas of the relation of these to the expansion of the universe seem to fit, with only slight modification, into what else has developed.

I think this group is progressing

A slight chance is developing that we may be able to send someone to a prestigious conference in Europe next summer. Don't hold your breath. the odds are not high.....

I have read through the Einstein Electricity Unit, I find the Unification ideal to apparently be sound. That is the idea that mass times acceleration of mass equals "Energy," that is the kinetic energy of translation of the unit under consideration, or, in my thinking, the "translational motion package" associated with an entity, to seem valid and an excellent advance.

The write up is excellent and I found only one place where the spell checker goofed up, "thee" for "the" in the explanation below one chart. I disagree somewhat with some of the explanation, however, this may be simply differences in view point. If it can be shown otherwise that the acceleration of "mass" is truly the expansion constant, at this "instant" of our Universe, this will be of considerable use in putting together the O/S model which agrees with the conclusions found in AI's work in so many ways.

This member has delved into areas which this writer has not dug into and his work appears to be very compatible. The spiral motion, counter-clockwise or "left-handed" for most readily observable motions in our "Universe" is noted. The ccw electron and cw proton which account for "negative and positive charges" is not mentioned, but, this is understandable, elsewhere in the literature it is only mentioned in this writer's "papers."

Some of the gravity results seem to fit very well into O/S. I'll try to examine that more closely later.

I hope that other members of this group will closely examine AI Zepper's conclusions and add their observations as to how they fit in....

Thanks, Eski.

Alm Must apolgize for misspelling your name! Also have a few more typos in the write up above.

I hope you will see fit to check how your work fits against other work here. Is there any way that I could ~~comment~~ comment internally on some sort of a working copy of your "book" something like can happen inside of Google Docs? There are places where your data seems "right on" but the expansions may be such that you cannot back them up with logic, or they conflict not only with the "conventional wisdom" but also with my conclusions, even though I, too, am in disagreement with the conventional "wisdom" on the particular point. I think that working together would be to our mutual advantage.

I realize that your entry into the group may have simply been by way of getting more exposure for your work, I hope that you will see us as a way for improving and extending your work.

Would also like to know more of your background. Clearly you have education in electricity and a strong interest in the field.....

Some Constants of the Universe?

Some constants of the Universe, as derived from the transference of information. (For more background information, see paper, "Reduction to One Dimension as Applied to Planck's Constant.")

In the above quoted paper, it was noted that Planck's constant could be taken as the evaluation of all the "dimensions" of a basic "Energy Package," i.e., amount of motion, this was considered as a "Whole" and, as such, equated to "ONE." From this, and other basic considerations arose the following list of basic constants of the universe, as related to information/energy transfer.

Some of the "Constants of nature derived from "h" and "c" that arise from the above considerations are the following:

1. The defining oscillator set equation: $m \times r = h/c = r \times m$.
2. Basic torque of oscillators: h/c
3. Average mass and radius: $(h/c)^{0.5}$ (The "SinVree Entity," * which probably does not exist other than transitorily.)
4. Apparent values of oscillator limits for information transfer: Absolute values in any given system of $ch/2\pi$ and $2\pi/c^2$
5. Frequency for basic information carrier: $1/h$
6. Mass, measured in "Our Half of Universe," : $2\pi/c^2$
7. Radius of basic information carrier or apparent carrier: $ch/2\pi$
8. Basic wave length: ch
10. Basic "time" unit, derived from average size radius of $(h/c)^{0.5}$: $2\pi(h^{0.5}/c^{1.5})$
This is time of one cycle at the average radius.

The numerical values of the above constants will depend upon the dimension set chosen to evaluate them.

Presumably, these above values could be the basis of a set of "Universal Values," similar to the Planck Values. As yet they have not been compared to see how they correspond.

One very interesting observation from the above is that the apparent unit that is responsible for information transfer is--as measured in our universe--much heavier and smaller than the proton, with a much greater vibrational frequency. As other parts of O/S theory suggest that there could be a continuous evolutionary development throughout existence, starting, perhaps, with something like the "zerotron," combination which would be splittable to the electron and positron but by distortion compressible to the neutron and thence to electron and proton. Proton and Anti-proton combination would form another neutral unit with limits closer to the "Sin-Vree" Entity, with that "Entity" being the "Ultimate--idealized unit" toward which the entirety would tend to be formed. Each successive cycle of changes producing units that more closely resembled this "shell." It seems just possible that the "Information Carrier" that arises in the above considerations is the current most prevalent approach to the "Sin-Vree" Idealization--a pulsating sphere which is otherwise undetected.

*The term, "Sin-Vree Entity," which would be pronounced, "Sin Free Entity," is a somewhat punning combination of the first syllables of the last names attached to papers on Helium.com which first proposed the idea of an "average unit" based on Planck's Constant and the Speed of Light. (Dean Sinclair and Hugh Vreeland).

Commenting and amplifying on KaSala's post. It should be emphasized that this site has a serious purpose focused on basic physics/chemical theory. Serious discussion of such things as Dr. Mills' Orbit Sphere, or even Zecariah Sitchen's ideas as to the 10th planet, might be valid but the site is not intended for discussion of human taboos, costumes, sexuality and such like topics, often lumped under the catch-all title of "Porn." Please don't waste our time in dumping such material, it's even a waste of your time posting here, even as "Spam."

Please reread the messages to new members before posting here. Thanks. ESKI (Dean L. Sinclair, Site Owner/Founder.

I am commenting on this as an example of the sort of thing that is a total waste of time on this site which is a site dedicated to a scientific research project. It has no need for discussions of human sexuality, human taboos and such material, which may be of interest to many people but has no value here. I am marking Helga as "no post."

Oscillator/Substance Model, Space-Time and QM.

The Oscillator/Substance Model seems to be more general than the "Accepted Models" of Space-Time and Quantum Mechanics.

A close look at Space-Time shows that the name, itself, suggests "substance" and, as is pointed out in the paper, "Why Einstein Was Right," the hidden factor or cycle, in time, allows the mathematics to work on a macro-scale where time is considered as the "dimension of continuing sequences of motion."

The influence or involvement of oscillatory motion is not included and the problem of distortion of information as the transmitter and receiver move relative to one another is probably over-emphasized and distorted in Relativity Considerations. Energy is not considered as a packet of motion and apparently is usually synonymous to Kinetic Energy of Translation.

That Mass is a Tension/Balance of motions at a surface does not appear as a concept.

Quantum Mechanics is a mathematical model which focuses on vibratory motion and again, linear motion. it's area is the energy (packets of motion) of electrons. This model does not appear to consider vib./rot. motion, motion about a center per se, and does not consider electron/proton motion interactions.

It would appear that both Space-Time and QM can be considered as bearing on smaller areas of consideration of the Oscillator/Substance View.

O.K> People, any comments? Hopefully....

[Reply to author](#) [Forward](#)

ka-sala [View profile](#)[More options](#) Oct 23 2009, 8:08 pm

Hello Eski,
1st... Your Quote.
<"It would appear that both Space-Time and QM can be considered as bearing on smaller areas of consideration of the Oscillator/Substance View.">

From whatever 'name' or angle one looks at energy, none can be left out of the O/S Theory. There is 'no energy' which does not oscillate, within whatever 'substance' one looks into. If what you want is only the Oscillator/Substance Model; this could never be reached without everything combined.

Simply put... It requires all these 'theories' you have mentioned in 'Energy Value' to gather the information sought, for the Oscillator/Substance Model. Once gathered, like all the pieces of a jigsaw, you can start putting your Model into action.

Getting 'off the ground' even NASA still needs to 'piggy back' whatever they want to send out there into that big Space-Time dimension, and could not have done this much, without the QM aiding them.

Hold onto all the threads each one has offered here in this site - weave them into what is it 'you' need - and like any good finished product, after tying the knots, the rest is discarded.

Everything here since you began, has been like a tree growing leaf by leaf. Now it's Time within your Space, to prune this O/S Tree, and see fruits of everyone's labor.

You planted the seed of this Oscillator/Substance Model; and your gardeners have helped tender it. It's not a 1,000 year old tree, but ready for the picking! Don't let the fruit drop and rot before you've tasted the goodness. Nor spend too much Time counting the leaves, or you really will need your QM to help. You'll end up somewhere in the Google Count. In short, what you want for your Oscillator/Substance Model, your Universal Particle has been there all the Time!

You know by now I only operate in the Light. Now you see me, now you don't. I'm so busy Oscillating in this Polarized Universe of where sometimes there are too many Theories, and not enough Action; I'm about to Spin off my Axis! You can 'hear' where I'm coming from. I was not born with a Mass of Tension, nor without the Scales of Balance as my right to use; which surface so often as acceptable or not acceptable within the motions which continually arise in this O/S Theory Site.

Perhaps in Space-Time when both are One, theories don't enter the equations of which Energy is what. In the Light it is all Speedy Specifics, and the Universal Co-ordinates of facts simply fit like a glove?

Take care, and enjoy Oscillating, Just gather what you have from the weavers of your tapestry, and tie the knots. You of all people should understand that one! Tesekkiur Eski...

BAEconstant//Planck'sConstantRevised

Options

3 messages - [Collapse all](#) - [Report discussion as spam](#)Jack O Suileabhain [View profile](#)[More options](#) Oct 25 2009, 10:42 am

Respectfully submitted to Dean L. Sinclair & Oscillator-Substance Theory Group

Author: Jack O'Suileabhain/O'Sullivan-

For formal submission to: Max Planck Institute--> M...@Mpe.mpg.de <&> R...@mpiwg-berlin.mpg.de <&>Oscillator-Substance-Theory group <&> vorte...@eskimo.com <-- From Jack O'Suileabhain(eng.'O'Sullivan) aka Jack 'Harbach' O'Sullivan

***** Planck's Constant Revised *****

*** Postulated necessary Planck revisions per extending fixed-definition-status to the value of 'E'-energy relative to Planck's-Constant's values for all subsequent international quantum-mechanics calculations hense forth***

Purpose of Paper: Introduction of a Seminal-alternate-Concept of defining newly a 'Fixed Universal Quantum' for all quantum-mechanics calculations for 'E' as for 'energy' as a fixed-universal-constant and newly minting this concept as the 'BAE-Constant' while specifically 'not' altering the contextual basis of Max Planck's constant; re: The Planck-Einstein-Dirac constant.

Rather; this paper is in extended support of the Planck's-Constant and 'not' in refutation of 'Planck-Einstein-Dirac' in any regard. In light of the purposed fixed-universal-value new definition of 'E' I will posit an alternative formula-revision of Einstein's classic $E=MC^2$ quared to solve for 'M'ass @ $M=EC^2$ quared. And this is also 'not' intended to alter Einstein but rather restate Einstein's formula(Einstein's-Constant) only in terms of the newly proposed assignment of said "universal fixed-quantum-formula-value for 'E.'" And further: I propose that the fixed-value of posited AExo-DarkSpace-ergo-DarkEnergy as $AE=EC^3$ ubed in light of the proposed fixed-quantum designation for the value expressed as the BAE-Constant of 'E,' aka the Base-Ambient-Constant of Energy.

This proposed conversion renders the classic Planck's-Constant $E=hv$ to $EC=hv$ as changed by the fixed definition of 'E'nergy to be here-forward expressed as the 'BAE-Constant' fixed-base-energy-value of Interstellar Space. Specifically the posit here is that there is a 'lowest-base-ambient-energy-density-level' to Interstellar Space; and below which that energy level cannot fall. The theory for this is that the quasi-static-energy-tension of our Universe mandates & sustains that BAE-Constant. And this is because our Universe is a relatively-low-energy-density bubble within a larger/virtually infinite DarkEnergy Aexo-space. And this AExo-DarkSpace exists at it's own Base-Ambient-Energy-Density-Level again of $AE=EC^3$ ubed and maintains the gravitational tensor-outpull upon our bubble universe. (Note: A sub-posit to this is that $AE=EC^3$ ubed also describes the nexial energy level of a black-hole-singularity ingress point into parallel Aexo-DarkSpace as is also at the outer fringe-border of our bubble universe with Aexo-DarkSpace)

Posit: There can be 'no total energy vacuum' that can exlude the density-field of energy below the BAE-Constant within our universe. And this is because the DarkSpace tensor-outpull tends to want to inexorably actually accelerate outward to itself all lower density objects & energy wave-forms than it's own original $AE=EC^3$ ubed base-ambient-energy-density-level, again, outward back into itself as a fluid dynamic flow system. Hubble clearly observes & articulates that inexorable outward acceleration of galaxies/mass/energy flow to the outer diameter-border of our bubble universe. And that border is the point where mass @ EC^2 quared has accelerated x 'C' light speed and reaches the DarkSpace ingress energy thresh-hole of $AE=EC^3$ ubed.

Free Brochure PublicPolicy.NEC.edu[The Fish Whisperer](#)Turbot farmer in Holland knows how to respect his fishes' needs! siemens.com/answers/fishwhisperer[See your message here...](#)

The rest of this paper attempts to provide theoretical proofs of the above based upon a revised- Planck's constant of (Photon= $E=hv$ ---->to----> BAE-Constant @ E therefore Photon= $E @ 'C'$ -light-speed= $(EC=hv)$ as Planck's revision. And this will perforce also revise Einstein's Constant @ $E=MC^2$ quared to $M=EC^2$ quared (to be demonstrated following).

Whereas Max Planck posited that certain discreet quanta cannot take on Indiscriminate-Values herein I extend that same premise to newly quantafying the value of 'E'nergy as pertains to quantum-mechanics. Thusly from here forth 'E' is to be held constant at a 'fixed-value' that I will attempt to define & quantafy by the Planck-Einstein constant. Here after I will refer to the fixed-value of 'E' regularly as the BAE-Constant.

Supporting Premise: The Dirac-Constant rather straight-forwardly describes 'Light' as 'Helicoid-Wave-String' enter:----> Photon 'E'nergy = $h/2\pi \times w = hv$ ---- (h= MPconstant & w=angular frequency & v=electro-magnetic frequency) eg. the double radii $2\pi a$ la' Dirac indicates circular diameter/wave-spin/wave-twist etc.)---->ergo----> Light as Helicoid-Wave-String a la' Dirac & a la' Planck.

Subsequently a Photon per duel particle/wavicle characteristic would logically= 1-wave-crest to 1-'Dirac-full-twist/spyro-loop'-wave-crest of afore-said 'Helicoid-wave-String.' And classically the Planck-Constant writes that as 1-Photon's energy-'E'= hv .

Central Key argument per the logic of Max Planck: Pragmatically 'E' must equal some 'constant' based upon the Planck-Einstein Constant rather than 'E' being merely a generically descriptive term merely in indication of the variously calculated sums of 'whole-quantum-energy' of sub-atomic particles &/or wave values in general terms. To my mind that seems somewhat slipshod 'not' to narrowly define 'E' in very specific fixed-quantum-value terms that would be universally-constant in all quantum-mechanics equations.

Max Planck's Constant is classically defining the 'E'-energy of a photon within light-wave-string obviously at 'light-speed' ergo $E=hv$. The problem here that 'C'-light-speed is 'not' an irrevocable constant-speed as regards to the fiction of 'the vacuum of space.' There is no-such-state as a complete energy vacuum. And 'space' relative density is compromised through gravitational warp-density rendering the idea of a 'Light Speed Constant' to be a defacto fiction relative to gravitational space-density stressors constantly impinging upon light's trajectory & drag vs speed. Hence the original proofs to Einstein's theory which perforce validated General Relativity etc.

There is difficulty here unless we define the ultimate base-constant of 'Light-Speed' by defining 'Light Speed' at a 'Fixed-Base-Ambient-Instellar-Space-Energy-density level' that cannot be further reduced because of the dynamic-quasi-static-tension of the Surrounding DarkEnergy gravitational out-pull-stressors upon our space-time-normal energy sheet within our bubble-space-time variable-normal universe. Then the relative interactive interchangeability of our various quantum mechanics experimental findings will not lack accuracy & therefore will not lack functional empiric validity. There are discoveries that we are missing by not establishing the BAE-Constant for 'E'-energy.

Accordingly then this modifies the Planck-Constant as follows: Logically then using 'E' as the fixed-quantum of the Base-Ambient-Energy Constant/BAE-Constant we can define Light Wave Photon energy-density simply as BAE-Constant 'E' x 'C' light-speed= Photon-energy-density. And so this concept simply converts the Planck-Constant Photon energy definition from $E = hv$ --> to --> $EC=hv$.

And as follows relative to the Planck-Einstein-Constant this new fixed-quantum-definition of 'E' as the Base-Ambient-Instellar-Space energy-density level expresses 'E' per 'Planck' as----> $E=hv/C$

Review revisions:

*Re: 'E' = BAE-Constant = hv/C

*Re: Planck's-Constant = 1-Photon = $EC = hv$

*Re: Mass of 1'H'-hydrogen= EC^2 quared = hv^2 quared = $(M=EC^2$ quared)

*Re: AExo-DarkSpace = DarkEnergy = EC^3 ubed = hv^3 ubed = $(AE=hv^3$ ubed= EC^3 ubed)

Recap: Planck Revised-->Photon= BAE-Constant @ Light-Speed

Old Planck-->Photon= $E=hv$ ----->Revised Planck----> $EC=hv$

Therefore $BAE = E = hv/C$

If then Einstein Revised says $M=EC^2$

then also $E = M/C^2$

then also $hv/C = M/C^2$

therefore $hv = M/C$

and also again $hv=EC$

therefore $\{hv\} \times C = M$ which is also neatly $\{hv\} \times C = EC^2 = (M=EC^2)$

and again said Revised Planck says Photon= $EC=hv$ because new BAE-Constant = E making Photon= $E@C$ -light speed

therefore as before revised Einstein says $M=EC \times C$ which also = $M = hv \times C$ which also = $M=EC^2$ which thusly becomes Revised Einstein per Revised Planck's-Constant per reassignment of the postulated 'now' fixed-universal-constant value for 'E'-energy as the BAE-Constant aka Base Ambient Energy universal-fixed Constant.

Again-----> $M=EC^2$ which is equal to ----> $\{hv\} \times C = M$

And again Planck revised restates Photon=> $EC=hv$ aka BAE-Constant of 'E' x C-light speed = $EC=hv$.

*Conclusional Postulate: Light Speed-'C' can only correctly be stated as an universal constant in the context of 'E'-energy being also stated as a fixed-universal-constant; and this within the further framework of a revisional re-expression of the Planck's Constant which in turn simultaneously revises Einstein's-Constant equation relative to the relationship of Mass to Energy to Light-Speed.

In short these revisions are stated: From $E=hv$ ----> $EC=hv$ as the Revised Max Planck's Constant---->&> which mandates, proves & articulates the Einstein Revision> From $E=MC^2$ ----> $M=EC^2$ perforce.

Jack:

Welcome to the group. However, how about as little more basic info as to why you are doing this revision, and what the meaning is? Most of us are not experts on Quantum Gravity and such.

In fact, I have doubts about both terms being used together having any meaning what so ever. So how about an explanation in "lay-man's language" that this stupid old duffer might understand? Eh?

Dean Sinclair

More comment on the original post. Basic energy level....Outer space seems to have a basic Energy, at least translational energy. as measured by temperature. at about 2.7 degrees Kelvin.

Light as a "heliocord etc.: Light travels along a line hence could be called a "string" or a cord. As there will be a spin, one can call this spin a helix, actually it is usually an expanding helix, so that could be a Helicord..

Yes, our universe is almost surely a tiny part of "Whatever Is" hence a bubble.

As to revising Planck's constant to a Basic Energy Constant. I guess this would fall under the fact that any multiple, power or root of a constant, or combination of constants can be considered another constant, which may, or may not be of practical value..... ESKI

-Alternate 'Atom' Model//BAE-Constant//DarkEnergy-Singularity Physics-per Jack O'Suileabhain/O'Sullivan(English)

*** Fusion-Gate/Plasma Breach Hyper-Gravionic Fusion Sustaining Reactors// aka Gray-Jet subSingularity Hyper-Plasma Gate Reactor ***

*** Quantum-Electron Shell/Fields are the same hyper-gravionic lobe/field that the Plasma-Breach Reactor exhibits. The Russian's made the reactor and did it, thusly are recently boasting of 'Gravity Manipulation' and creating electro-plasmic/hypergravionic lobe fields that can interdict aircraft & missiles and stress their superstructures so violently that they are virtually 'ripped from the skys.'***

*** I know this because I helped them do it. Whitt Brantley of NASA confirmed their success.***

~Root Einstein 're-configuration basis' for Singularity-Transdimensional HyperPlasma-Breach Physics~

1'E'nergy=Base(bottom)ambient energy speed-density state of Interstellar Space.

Mass solved for: 'M'ass=EC^2quared'----->formula modification for re-definition of 'E'.

Light/Photonic wave-string wave-to-wave speed-density/mass:--> 'P'=EC. or simply Light='E'nergy @ Light-Speed.

Quantum-Electron Speed-density/Electro-PlasmicGravionic field Mass= (E x C/2)^2quared.

AEX=EC^3ubed is the (BAE-Constant)Base-Ambient Energy Speed-Density level of transdimensional 'Parallel-AexoDarkSpace,' which speed-density the galaxies at the border fringe of the universe have accelerated to @ Mass's EC^2quared x 'C'-LightSpeed=EC^3ubed. And at this juncture galaxies turn into MegaGammaRayBursters as their Hub-Central-Grayhole Singularities turn to Black-Hole status 'again' @ EC^3ubed speed-density(as well as the singularity-centres of each & every Proton); and thusly en-toto all galaxies & mass are returned/reabsorbed/reintegrated into Parent AexoDarkSpace.

** *And most likely the White-Hole Singularity BIG-BANG site out of Parent DarkEnergy Aexospace is still a White-Hole Fountaining ingress point of sub-DarkEnergy super-plasma.

PlasmaBreach Reactors are provide a Giga-Input/Mega-Output Electro-Plasmic Gyro-toroid fractional/& incipient Gray-Hole subSingularity Reactor. The eye-centre of the induced electro-plasma worm-hole subDarkEnergy super-plasma cross-over point.

Protons are this in micro-cosm. Their Quantum-Electron Shell/Fields are the same hyper-gravionic lobe/field that the Plasma-Breach Reactor exhibits. The Russian's made the reactor and did it, thusly are recently boasting of 'Gravity Manipulation' and creating electro-plasmic/hypergravionic lobe fields that can interdict aircraft & missiles and stress their superstructures so violently that they are virtually 'ripped from the skys.'

I know this because I helped them do it. Whitt Brantley of NASA confirmed their success.

Thus: Below the Singularity event horizon at the 'reintegration nexus' said 'Nexus'=EC³ubed as the reabsorption point back into AexoSpace/DarkSpace."

Our Universe & an infinite plethora of universe's like us(more or less) are relatively Low-Energy Speed-Density Bubbles within the greater Parent HyperFluidic/HyperSpeed-Dense DarkEnergy Aexospace/DarkSpace/SuperCosmos.

***And via PlasmaBreach Reactors we can 'tap' AexoDarkSpace High Energy levels which can sustain Fusion but is largely unnecessary as 'throating down' the 'PlasmaBreach Reactor Gate' avails us of all the HyperGravionic/EM Induction potential that we need and so very much more. Focused Gravity Hyper-Propulsion and Time-Dilatation are merely bottom end of the potential.

Using a Hydrogen Atom new Model: Consider that the configuration of the H-Atom building block of ALL ATOMS to be along the lines of a GYRO-SCOPE-kind've. For argument's sake I'll say that the PROTON were a Gyro-Centrifugal Toroidal-HyperCompaction of (E'nergy/Atomic E-force/Electro-plasmic-gravionic micro-singularity force ALL INTERCHANGABLE CONCEPTS FOR THIS MODEL.

I'm putting forth that the Proton centered Atom is a micro-singularity tapped/wormholed into an inexhaustable Parallel Space Dark Energy infinite E-Force Source. And I've also call this the SUPER-MEMBRANE. And s'theoretically' this 'Parallel SuperSpace/DarkSpace is the parent-source and surrounding sustainer of our bubble universe and an infinitude like us. And this is a SUPER-DYNAMIC E-FORCE FLUID DYNAMIC FLOW SYSTEM whose Quantum Gravionic signature from the centre of protons in dynamic opposition to the Gravionic Out-pull of surrounding PARENT DARKSPACE upon our Bubble Universe's lower density E-Force membrane sheet. Hence the explanation of EVERYTHING from 'SPOOKY ACTION A DISTANCE' to the OUTWARD ACCELERATION of ALL MASS/GALAXIES etc.

Without this picture these things will be VIRTUALLY IMPOSSIBLE TO INTEGRATE into a cohesive Atomic/Nuclear/Astrophysical construct and make ANY REAL PROGRESS. But we will and wonders stand at our scientific door-step that would beggar Jules Verne, Aldous Huxley, & H.G. Welles combined.

The core of our micro-singularity aka Gyro-Centrifugally Hyper-Compacted Proton Toroid is a singularity centred E-force/Inflow axis which creates the EM-FIELD SHELL that I call the 'Quantum-Electron' AND is an axial-perpendicular flow of lesser density Electro-Plasmic E-force. And this is what 'stabilizes' the Proton as a 'balanced singularity' not black/not white, but a GRAY HOLE MICRO-SINGULARITY SYSTEM. Added inductant quantum-electron charge/flow effects the proton by slightly increasing the Quantum-Electron & thus 'whole atom charge' and thusly 'dialates' the proton turning it 'slightly whitish' which is even MORE PROFOUND with conductors & superconductors which makes their OUTER ELECTRON-SHELLS extremely SLIPPERY(quasi-isotopically-slightly-unstable) while conducting electro-E-force current.

So the 'dialated up-forced proton singularity centres' becomes a COMMON EXPLANATION by degree of E-force added/stimulated for all EM-PHENOMENA, NUCLEAR PHENOMENA & ELECTRO-CHEMICAL PHENOMENA(stimulated to micro-white-hole status=nuclear reactions) AND gravionic phenomenon. EXPANDED E-FORCE means a sped up proton-toroid, which means a more centrifugally-compacted-densified whole atomic-field, which means the INCREASED TOROIDALLY E-force VISCOSITY ACCUMULATIVE and COMPRESSIVE of ADJACENT E-SHEET which is GRAVITY. Like the cotton candy machine model INCREASED E-FORCE SPEED DENSITY= increased E-force viscosity PLUS increased SPIN-TWIST which is what REALS-IN & compresses/warps the adjacent E-force sheet of Space-Time.

RELATIVE PROTON-ELECTRON ATOMIC WEIGHT: That quantum-electron shell is about a lesser density to the Proton @ approx. quanta of (1E-force x 1/2 light speed)squared. And for argument sake the Proton's 'weight/speed density' added to the quantum-electron makes up a 'modified Einstein formula for mass/energy' @ (Mass=E-force x light speed) squared.

Note: I'm using a hypothetical '1E-force' new-standard-quanta as the Base Ambient Energy level of Interstellar Space-Time-Normal or the 'Bottom Base Energy Density of our Bubble Universe.'

CASE IN POINT: STANDARD HYDROLYSIS by my reckoning functions resulting from Quantum-Electron Flow (electricity) effecting the Electro-Valent Shelled Proton(as a WHOLE SINGULARITY SYSTEM) by amping up the atomic-field to the point of EXPANDING THE DIALATION of the PROTON's singularity centre.

EVERY ATOMIC QUANTUM ELECTRON OUTER SHELL has the potential to hold

EXCESS Electro-Plasmic E-FORCE/aka/QUANTUM ELECTRON CHARGE and Molecules thus FULL to EXCESS charged lend themselves TO parting themselves from their MOLECULAR COMRADE ATOMS.

ABOVE HYDROGEN ATOMIC NUMBER NEUTRONS are 'not' MICRO-SINGULARITIES but evidentiary of an UP-ENERGIED MOLECULAR MULTI-SINGULARITY CONSTRUCT that CREATES/BUILDS NEUTRONS via the NOW UP-ENERGIED EXPANDED PROTON-MICROSINGULARITIES ingresses excess ELECTRO-PLASMIC E-Force austensibly BLED-IN from PARALLEL DARK SPACE via dialated Proton-Singularity eyes.

AND NEUTRONS like ROLLER BEARINGS buffering/separating THE SYSTEM FUNCTIONS of the ELECTRO-VALENT QUANTUM-ELECTRON SHELLS are THE BONDING GLUE whose construct SPEED-DENSITY connects WITHOUT DESTABILIZING the Atoms within Molecules. Basically the Neutron SHARES INTER-FLOW E-force energy with the adjacent atoms BUT WITHOUT INTERFERRING with their INTERNAL SYSTEMIC INTEGRITY.

OFCOURSE I'M STATING WHAT WE ALREADY KNOW in somewhat MODIFIED TERMS that I obviously surmise to be more accurate a portrayal of what we know to be prozaic chemistry/physics AS WELL AS to accurately define THE EXOTIC PHENOMENON that conventional theory is virtually CLUELESS TO EXPLAIN.

I see the the Atom as a Gyroscope like-toroidal flow system, using somewhat the model of the Axial-EM& VanAllenBelt flow fields of our planet, (and singularity centred galaxies for that matter). The electro-valent onion-like shell system to larger atoms I see to follow precisely the empirical Quantum-Electron count per-shell as conventional chemistry. I just describe 'electrons vs electron flow' somewhat differently.

FREE ELECTRON FLOW: Are more akin to our idea as light-wave/photon function as a WAVICLE propertied affair that I would call HELICOID-WAVE STRING and for ELECTRON FLOW that each HELICOID Wave-crest-to-crest also constitutes a QUANTUM ELECTRON; and again @ electron E-Force/speed-density @ (E-force x 1/2 lightspeed)squared.

THIS I CALL THE ATOMIC BASE DEFINITION for what is SINGULARITY/TRANSDIMENSIONAL PHYSICS.

IF CONSERVATION OF ENERGY discounts Parallel Dark Space & Protons as micro-singularities; then it is merely an ARCHAIC NEWTONISM which is merely SUPERFICIALLY DESCRIPTIVE but fundamentally INACCURATE and thusly a flawed psuedo-truism of REDUNDANT & passe' VIEWS of PHYSICS. Singularity/Transdimensional Physics. . . .

OF THE BIG BANG SINGULARITY which 'BORNED' our GREEN BUBBLE UNIVERSE from PARENT

DARK-ENERGY INFINITE AEXOCOSMIC DARK-SPACE. . . aka AEXO-DarkSpace.

AND THIS RISES as a NORMAL PROCESS of the BASE AMBIENT DARKENERGY of AEXO-DarkSpace which is the basis discovery concept FINALLY DEFINING Einstein's- Cosmological-Constant' which has a root-mobius formula of the BIG BANG instantaneous BUBBLE UNIVERSE expansion rate formulated as ENERGY SPEED-DENSITY FORMULA:

*** Speed of Light Cubed-(C^3ubed) SPEED X Interstellar space Base-Ambient Speed-Density as ONE-ENERGY-(1'E') divided by Speed of light Cubed----->(E/C^3)DENSITY ergo:

~the BIG BANG EXPANSION SPEED-DENSITY RATE= C^3ubed SPEED x E/C^3ubed DENSITY~ which moves as HYPER-TIME Speed-Density Expansion Rate. . . thus is the ROOT FORMULA of the COSMOLOGICAL CONSTANT.

COSMOLOGICAL CONSTANT AEXO-Dark Space= EC^3ubed: FOLLOWING as 'one' through 'four' in the articulation of UNIVERSE CREATION out of AEXO-DarkSpace HYPER-SPEED-DENSE current dynamics.

AEXO-DarkSpace @ EC^3ubed FRACTALLATING HYPERDYNAMIC (wild) current dynamics of said DARKSPACE-AEXOCOSMOS has it's base ambient speed-density as AEXO-DarkSpace @ (AEX=EC^3ubed). Our Newly born Bubble Universe was INFLATED via AEXO-DarkSpace super-plasma VIA the ingress BIG BANG AEXO-DarkSpace-GYRO-TOROIDAL-Singularity and that FIRST INFLATED our BUBBLE UNIVERSE. This birth-singularity would be a WHITE-HOLE from the NEWLY-FORMED BUBBLE UNIVERSES 'point of view.'

#1. This BASE-Ambient COSMOLOGICAL CONSTANT of the BIG-BANG is thusly:ONE-ENERGY INTERSTELLAR SPACE as 1'E'nergy={ (C^3ubed) SPEED x 1'E'/C^3ubed DENSITY} mobius fashion formulates (again) the 1'E'nergy Instellar Space speed-density . . which is the HYPER-TIME RATE base ambient EXPANSION RATE @ virtually INSTANTANEOUS EXPANSION/INFLATION RATE of the BIG BANG. . . AND the BIG BANG is a Bubble-Universe-forming SINGULARITY via the eye of a DarkEnergy/AEXO-DarkSpace EYE-singularity-LOW-SPEED-DENSE centre of a routine AEXO-DarkSpace GYRO-TOROIDAL MAELSTROM.

And from our BUBBLE UNIVERSE SIDE said singularity OUT of AEXO-Dark-Space is a MEGA-WHITE-HOLE creation singularity INTO OURSPACE. And again the INJECTED super-plasma out of AEXO-DarkSpace expands the BUBBLE instantaneously at the HYPER-TIME-RATE of 'Base-Ambient ONE-'E'nergy Interstellar-Bubble Membrane Space'= 1'E'= C^3ubed SPEED(of expansion x E/C^3ubed HYPER LOW DENSITY primal MEMBRANE-SPACE-----DENSITY. . . ~

add to that, the EINSTEIN REVISION #2. 'M'ass=1'E' x C^2quared, (or), 'M'=EC^quared. . . rather than the more familiar E=MC^2quared. This would also function as 'M'=EC^2quared as the Base-energy Speed-Density of the HYDROGEN-ATOM.

add to that redefining the 'Zero-Point' of Feynmans ZERO-POINT ENERGY eg ZPE is simply 1'E' Instellar-space Membrane: #3. 1'E' @ C(light-speed)=EC=LIGHT, or(EC=Light) 'or' 1 base ambient interstellar 'E'nergy(which is cross-equivalent to Feynman's conceptual-ZPE/ZeroPointEnergy) then accelerated to Light-Speed takes the speed-density spin-twist form as HELICOID-WAVICLE-LIGHTSTRING which classically we interpret as WAVE &/or PHOTON-PARTICLE(One WAVE/wave-crest to wave-crest= ONE QUANTUM-PHOTON) simultaneously both WAVE as well as PARTICLE-INPACT-WAVE SEGMENT.

add to that #4. 'One-Hydrogen Electro-valent-shell(icle)Field' = ONE QUANTUM ELECTRON(QE) @ speed-density QE= (EC/2)^2quared 'or' (1'E'nergy x Half-Light-Speed)Squared

*** Thus are (roughly) the FOUR-PHASE PARAMETERS of the EINSTEINIAN COSMOLOGICAL-CONSTANT ***

*** The COSMOLOGICAL CONSTANT Overview: WE ARE ONE CHAMPAGNE BUBBLE Universe among INFINITE MYRIADS of like BUBBLE UNIVERSE's

SUCH AS OURSELF being CONTINUALLY BORN at the heart of DARKSPACE super-eddie gyro-toroidal

MAELSTROMS that open LOW-DENSITY SINGULARITIES at their EYE-Centre-Points which form the BIG-BANG

BUBBLES of said UNIVERSES.

THE SIMPLE FORMULA RATIO 'constant' that controls ALL RELATIVE 'TIME' & GRAVITY which in-turn determines

their mass/energy flow/& relative 'time' dynamics is that the ORIGINAL BUBBLE that forms the ONE-'E'energy MEMBRANE SHEET of INTERSTELLAR SPACE IS ratioed THUSLY:

***** The Base-Ambient-Universe ONE-ENERGY@'1-E' energy MEMBRANE formulates as--> $1'E' = C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$. And by this formula-ratio which at $C^3 \text{ubed SUPER-SPEED FORMS}$ the ENTIRE atom-mass EMPTY ENERGY-BUBBLE within a SINGLE SPLIT-INSTANT.

AND WITHIN THE NEXT INSTANT: then our NEW-EMPTY BUBBLE UNIVERSE is then recipient to a centre-bubble injection via the 'AEXO-DarkSpace birth SINGULARITY of the PRIMAL Sub-AEXO-base ambient MINUS- $C^3 \text{ubed super-plasma WHICH}$ creates a SUPER-SPAGHETTIFIED EC^2 (atomic mass speed-density{Hydrogen}) Helicoid Wave-string UNIVERSE CENTRAL NEBULA which is the STAR-BIRTH ROOKERIE of GALAXIES. The EC^2 quared Helicoid Wave-string segments to PROTON DENSITY SEGMENTS that immediately hyper-collapse and form ALL PROTONS as BALANCED-GRAY-JET micro-singularities replete with AXIAL FLOW ELECTRO-VALENT SHELLS making EACH PROTON a Gray-Jet Singularity System PERENNIALY FED by/linked to PARALLEL AEXO-DarkSpace as the UBIQUITOUS DYNAMO Back-Of-The-Tapestry ENGINE of ALL COSMIC PHENOMENA.

AGAIN: INITIALLY THE AEXO-DarkSpace Parent BIG-BANG SINGULARITY COLLAPSES when it's DARKSPACE MAELSTROM, by SINGULARITY DRAG, then super COLLAPSES injecting super-plasma becoming said ATOMIC HYDROGEN DENSITY BIRTH-NEBULA. And that original INJECTED SUPER-DARKSPACE-PLASMA instantly SPAGHETTIFIES into MASSIVE wavefront expanding clouds of EC^2 quared(approx.) HELICOID WAVE STRING which segments to HYPER-SNAP DOWN to form HYDROGEN PROTONS AS GRAYJET MICROSINGULARITY ELECTRO-VALENT SYSTEMS; with are HYDROGEN ATOMS.

*Base Ambient 'HYPER-TIME' rate of Space-Time 'E'-MEMBRANE: THE FURTHER evolution of galaxies PROCESS WE HAVE PRETTY WELL NAILED DOWN(Silk, Reiss, Woosley, & Perlmutter, etc.) as the GALAXIES ACCELERATE to the outer AEXO-DarkSpace BUBBLE BORDER that the GREEN-'E'energy Space-Time 'MEMBRANE-Sheet' flows perennially into @ $C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$. This is ONE-'E'nergy Space-Time @ HYPERSPEED which is more easily just designated HYPER-TIME.

HENSE the GREEN-MEMBRANE $1'E' \text{nergy BUBBLE}$ expanded @ the SPEED of LIGHT CUBED or simply $EC^3 \text{ubed}$.(on this key-board~;-)

THIS SIMPLY MEANS that THE ORIGINAL $1'E' = C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$ interstellar membrane MOVES @ HYPER-TIME progression-rate @ $C^3 \text{ubed}$.

*BIO-PLANETARY GRAVITY-level 'TIME' rate: AND @ EC^2 quared HYDROGEN-ATOMIC MASS ultimately creates the BIO-PLANETARY SPEED-DENSITY MASS that we know as OUR VERSION of slower NORMAL-TIME but a HIGHER-MASS-DENSITY.

OR-->TIME-FLOW-RATE is the relative INVERSE PROPORTION of Atom-MASS SPEED-DENSITY to MEMBRANE-InterStellar SPACE-TIME flow SPEED-DENSITY.

EVEN MORE EASILY STATED: MASS SPEED-DENSITY = GRAVITY that as SPEED & THUSLY DENSITY INCREASES as MASS ACCELERATES(and thus densifies increasing 'gravity') ----->GRAVITY INCREASE WITH MASS DENSITY inversely MAX-SPEED HYPER-TIME of the Interstellar-Space-Time GREEN-'E' MEMBRANE.

AND AGAIN: THE HIGHEST TIME FLOW RATE is the GREEN-'E'-Membrane @ $C^3 \text{ubed SPEED} \times E/C^3 \text{ubed Density}$.

*** MASS-GRAVITY = 'ENERGY SPEED-DENSITY.' ALL WAVE-STRING (all 'wave-lengths' in the SPECTRUM) ACCELERATE on the ENERGETIC $1'E'$ -GREEN-MEMBRANE via the NATURAL SPIN-TWIST property of ENERGY ----->ALL ENERGY is perennially

accelerating & densifying UP THROUGH THE WAVE-LENGTH SPECTRUM SCALE and thus continually further gaining the SPEED-DENSITY PROPERTY of the CONSTANT REELING-IN and LOCALLY-COMPRESSING the SPACE-TIME GREEN-1'E'-MEMBRANE. This is EINSTEIN and PROVEN.

*** THE PERENNIAL 'outward' ACCELERATION is due to HYPER-SPEED DENSITY @ C³ubed of outer AEXO-DarkSpace so that ATOM-MASS locally Space-Time reeling-in & COMPRESSING & outer AEXO-DarkSpace from the surrounding BUBBLE-UNIVERSE-BORDER constantly Space-Time reeling-in & compressing ARE PLAYING A CONSTANT TUG-of-WAR which is CONSTANTLY tending to ACCELERATING Atom-MASS on the perennially out-flowing Space-Time Green-'E'-Membrane as THIS EFFECT CAUSES A CONSTANT DIALATION of PROTON-GrayJet Micro-Singularity EYE-CONNECTION also thus internally to AEXO-DarkSpace causing further SPEED-DENSITY in THE ATOM-FIELD which intum COMPRESSES FURTHER Ambient 'E'-membrane SPEED-DENSITY SPACE-TIME WARPAGE locally.

*** THUS GRAVITY is DEFINED ULTIMATELY as a function of AEXO-DarkSpace: AEXO-DarkSpace surrounding our GREEN-'E'-MEMBRANE Space-Time PULLS UNRELENTINGLY to the AEXO-DarkSpace Gray-Jet Micro Singularity FIELD of ATOMIC-PROTON-Electro-Valent MASS much in a AGONISTIC-ANTAGONISTIC push pull of VIRTUALLY ALL PLANETARY & COSMIC NATURAL SYSTEM-PHENOMENA.

* GRAVITY more briefly is the affect of that ATOM-PROTONS tornadically SPIN-UP and DENSIFY the AMBIENT-'E'nergy MEMBRANE & thusly INCREASE their relative SPEED-DENSITY MASS and thus GATHERING other SPEED-DENSE adjacent ENERGY FIELDS & ATOM-MASS.

***ACCELERATING GALACTIC-MASS moves to merge ultimately with the HYPER-FLUIDIC SPEED-DENSITY of AEXO-DarkSpace @ C³ubed which is VIRTUAL-NO-TIME aka the simple CANCELING OUT of the 'TIME' effect of LOWER SPEED-DENSITY BUBBLE UNIVERSE fluid-dynamic systems.

THUSLY AS WE TAP AEXO-DarkSpace and use ELECTRO-PLASMIC-BREACH GRAYJET REACTOR FIELDS to SURROUND such reactor POWERED CRAFT; then MOVING WITHIN the HYPER SPEED-DENSE DarkSpace PARALLEL SPACE FIELD makes us IMMUNE TO THE RELATIVE MOVEMENT OF 'TIME' & also INERTIA-IMMUNE as we've created our own mini-poidal psuedo-bubble universe TO BE PROPELLED @ 'VIRTUAL NO-TIME' virtually infinite speeds.

AS THIS IS A HYPER-GRAVITY point lead FOCUSED FIELD we move within a VIRTUAL WORM-HOLE/WORM TUBE which is OPENING JUST AHEAD of the craft & CLOSING JUST BEHIND same.

FROM THE VANTAGE OF AEXO-DarkSpace DISPLACEMENT 'time' is a symptomatic incidental with the LOW SPEED DENSITY BUBBLE UNIVERSE as a mere function of LOW-SPEED density vs. speed ratio dynamic. ALSO THE BUBBLE UNIVERSE is A QUASI-SINGLE-Cell fluid-dynamic ORGANISM filled with INTERIOR-COSMIC ORGANELLES with EXCHANGE ENERGY & INTERREACT via the UNBIQUITOUS-GREEN Energy SPACE-TIME MEMBRANE.

!!! HERE IS THE KICKER !!! ALL SO CALLED 'TIME' is ONE INTER-REACTIVE interwoven SKEIN of CONTUGUOUS ENERGY FLOW-currents-threads within the MEMBRANE. THE BUBBLE BEGINS & it's ENERGY-FLOW reconnects perennially BACK into VIRTUAL NO-TIME AEXO-DarkSpace where TIME IS IRRELEVANT. AND from AEXO-DarkSpace VIRTUAL-NO-TIME the BUBBLE and ALL ITS CURRENT DYNAMIC PROCESSES are CONTIGUOUS & SIMULTANEOUS and thusly ANY MOMENT IN TIME is PERENNIALY 'TOUCHABLE/REACHABLE' from a 'craft' within the AEXO-DarkSpace C³ubed SPEED-DENSITY FIELD @ VIRTUAL-NO-TIME.

OOPS: Our Universe is a SINGLE 'mortally-limited' FINITE bubble COSMIC MACRO-ORGANISM: All Space & Time is ONE SINGLE EXANT-MOMENT of ENERGETIC INTERACTION. . . WE ARE A COSMIC BACTERIA. . .

TIME-MACHINE: FROM AEXO-DarkSpace, HYPER-GRAV TUBE Gray-Jet Singularity Reactors can TOUCH ANY POINT ON THE SPACE-TIME MEMBRANE WITHIN THE GREEN-1'E'-BUBBLE because, from the VANTAGE POINT of AEXO-DarkSpace ALL TIME is ONE-SINGLE MOMENT of ENERGY REACTION and FORWARD & BACKWARD in 'TIME' are largely INCIDENTAL IRRELEVANCIES and NOT A LIMITATION to ACCESSING ----->what we see as ANY-TIME or ANY-PLACE!

ANY POINT is ACCESSABLE in our 'BUBBLE UNIVERSE'S RELATIVE-SPACE-TIME-GREEN-MEMBRANE' because; as we see, 'SPACE-TIME' is FINITE having a 'BIRTH

POINT-Birth Moment' and also has a GREEN-Membrane FINAL DESTINATION. AND THUSLY 'SPACE-TIME' has a DIRECTIONAL FLOW & simple BEGINNING & ENDING parameters. Simply put; our Bubble-Universe is NOT FOREVER. . . . though AEXO-DarkSpace IS; more or less!~;-)

AND THE AEXO-DarkSpace SUPERCOSMOS is INFINITE where 'TIME' itself is NEITHER EXTANT nor RELEVANT which makes even the term AETERNAL to be of NO PRACTICAL EMPIRICAL VALUE.

*** THE 'NUCLEUS' of our GREEN-1'E'-membrane BUBBLE UNIVERSE as BACTERIA:

THE POINT-CENTRE GALAXY-BIRTH NEBULA formed when the original BIG-BANG COLLAPSE-INJECTION BIRTH SINGULARITY #1 formed the 1'E'-GREEN energy BUBBLE; then #2 received the BIRTH-Super-Plasma Injection; then #3 REBOUNDED from the collapse forming a REBOUND GRAY-JET SINGULARITY. The ASSISTING-dynamic RE-IN-PULL came from the OUTER-BUBBLE-BORDER dynamic FLOW-TENSION on the OUT-FLOWING GREEN-'E'-Membrane THEN FORMING that (now)t REBOUND GRAY-JET GALAXY-ROOKERIE-NEBULA perennial BIRTH FOUNTAIN @ CENTRE UNIVERSE.

THE WAVE-LENGTH-'GRAIN' of perennial 1'E'-MEMBRANE out-flow moves CONSTANTLY 'outward' to the DARKSPACE BORDERS THAT GALAXIES ACCELERATE TO CONSTANTLY. AND when EC^2 squared-MASS galaxies accelerate to 'C' lightspeed THEY EQUATIONALLY balance to EC^3 ubed AEXO-DarkSpace and EVERY PROTON balanced GRAY-JET micro-singularity & EVERY 'GALACTIC-HUB balanced GRAY-JET mega-singulatiy' move to BLACK-HOLE STAGE and 'EAT' the entire GALACTIC MASS back into AEXO-DarkSpace virtually from the INSIDE-OUT. AT THIS MOMENT they elicit MEGA-GAMMA-RAY BURSTER JETS in the PROCESS heralding the COMING-HOME to AEXO-DarkSpace which is the ultimate destination of ALL GALACTIC gray-jet-singularity PROTON MASS & everyother wave-length speed-density upon the UBIQUITOUS GREEN-'E'nergy MEBRANE.

OUR CURRENT (Centre-Universe) GRAND-CENTRAL GRAY-JET SINGULARITY feeds its SURROUNDING GALACTIC-ROOKERY NEBULAE which is the relative NUCLEUS of OUR BUBBLE UNIVERSE and fortunately(or unfortunately) the ANALOGY to OUR BUBBLE universe as us being a COSMIC BACTERTIA stands quite well! OOPs-oh-dear again!~;-)

And much smaller GALACTIC-HUB GRAY-JET SINGULARITIES form the galaxies as COSMIC-ORGANELLES upon the ubiquitous GREEN-1'E'nergy Space-Time MEMBRANE of our BUBBLE UNIVERSE fluid-dynamic system OUT OF AEXO-DarkSpace---EMPOWERED & ENERGIZED by AEXO-DarkSpace--->and finally BACK INTO AEXO-DarkSpace!

THUSLY: ^) St. Patrick's Day TIME-TRAVEL-MACHINE FORMULA-RATIOs for our GREEN-1'E'nergy BUBBLE UNIVERSE go again as follows:

HYPER-TIME/Instellar Space-Time=Base-Ambient GREEN-'E'nergy MEBRANE SPACE @ (1-'E'nergy) Speed-Density: $1'E' = C^3$ ubed(light-speed cubed) SPEED x E/C^3 ubed DENSITY.

BIO-PLANETARY 'TIME-RATE' flow @ PROTON-gray-jet micro-singularity ATOMIC MASS= 1'E' DENSITY x C^2 quared (light-speed squared) SPEED.

HELICOID light-string @ light-speed= LIGHT @ 1'E'nergy X 'C' (light-speed).

EC /Light also = MINIMUM SPEED DENSITY @ the original super-plasmic spaghettifying cloud @ the OUT SURFACE of ingressing BIG-BANG injected sub-AEXO-DarkSpace super-plasma. And this HYPER-INITIALLY SLOWING DOWN super-plasma HELICOID SPAGHETTIFIED ENERGY WAVE-STRING slows down to light-speed and eliciting THE BIRTH FLASH surrounding the NOW NUCLEUS-NEBULA around the NOW REBOUND GRAND-CENTRAL GRAY-JET UNIVERSE-EYE-SINGULARITY(ongoing).

*** Likely that LIGHT-SPEED outer FRINGE of the INITIAL INJECTED BIRTH NEBULA plasma-cloud appeared to suddenly EMIT A HUGE 'FLASH' of FRINGE WAVE-FRONTs of SPAGHETTIFIED Helicoid-'E' string TRAVELING @ light-speed('C').

*** ALSO NOTE: that that FLASH Light-Speed fringe ENERGY-SLOW-DOWN would have been a product of the FIRST ENERGY @ light-speed to begin the LONG ACCELERATING JOURNEY on the GREEN-'E'nergy UNIVERSE InterStellar Space-Time MEMBRANE back out to AEXO-DarkSpace @ the OUTER-BORDER of our BUBBLE UNIVERSE.

AND ULTIMATELY that first MASSIVE LIGHT-WAVE of HELICOID ENERGY-WAVE-STRING-MASSIVE FRONT would have reached HIGHER SPEED Hydrogen Mass EC^2 quared SPEED-DENSITY and become the SECOND WAVE Hydrogen-Nebula Source forming SECOND WAVE HYDROGEN NEBULA PROTO-STAR ROOKERIES.

THUSLY 'C' Light-Speed' is become the COSMIC-GOLDEN-RULE-INCREMENTAL ratio-designating-building block for ALL SPACE-TIME RATIO calculations WHICH ALBERT EINSTEIN already WELL ESTABLISHED. FROM THE TOP DOWNWARD the INJECTED Birth-super-plasma from AEXO-DarkSpace BY-LAW could NOT DECELERATE lower-slower-speed-density than ENERGY @ LIGHT SPEED, which is EC helicoid-light-string, which is simply 'LIGHT.'

*** OUR TIME-MACHINE BUBBLE UNIVERSE: WORMHOLING GRAVITATIONALLY via OUR GRAY-JET SINGULARITY DARK-ENERGY REACTORS literally is WELL & SIMPLY ACCESSABLE using AEXO-DarkSpace TAPPED Gray-Jet Singularity POINT -LEAD-PROPULSIVE FOCUSED Hyper-Gravity Speed-Dense fields to LITERALLY 'BORE OUR WAY' via HYPER-GRAV TUBE/worm-tunnel to ANY SPACE-TIME POINT THAT WE WISH. And this is not only THINKABLE but actually DO-ABLE with even MUCH LESS IMAGINATIVE-INTUITIVE agency than EINSTEIN who started this WILD RIDE BACK-TO-THE-FUTURE-----and the PAST ALSO-----& imminently potentially-----& VIRTUALLY; AT-WILL!

AND AS WE 'THINK' it, and as we SEE-IT, so CAN WE DO IT!~;-)

SO THUSLY; absolutely & imminently in reach is PROPELLED MOVEMENT BACK & FORTH, and TO & FRO along the GREEN-ENERGY Space-Time MEMBRANE FLOW path to the from CENTRE of our UNIVERSE to it's OUTER FINITE-BORDER. And THIS depending on the INTENSITY OF THE FOCUS-LEVEL of the HYPER-GRAV FIELD THAT WE CALIBRATE for our REACTORS to GENERATE; lies also the MEANS to be also moving BACK & FORTH IN 'TIME' WITHIN a 'TIME-IMMUNE' & also 'INERTIA IMMUNE super Gravity FIELD-BUBBLE. . . and ALL of THIS within the VIRTUAL-WINK of the VIRTUAL-NO-TIME eye of SCHROEDINGER'S VIRTUAL CAT!

Thankyou// Jack O'Suilleabhain

Researchers,posting on a closed Internet site have reported that, in a Cavitation Collapse experiment, they produced--among other things--a melange of elements, consistent with what they called a "Nova Event." They also report that they became very ill. The symptoms are of radiation poisoning. They also note that later checking showed a "neutron burst."

O/S work indicates that there may be as many as 10^{54} --plus or minus a few million orders of magnitude--of neutral oscillators in any centimeter of any space. It also indicates that some--possibly even most--of these are possibly "Shock Wave Convertible" to neutrons or "neutron-like" units.

In consideration of the above, the results reported seem creditable, and raise a red flag for anyone working with experiments which could create an intense shock wave.

Dean Sinclair (Eski)

LComment on Schroedinger Equatiion, Also. Happy New Year Options

1 message - [Collapse all](#) - [Report discussion as spam](#)

dean sinclair [View profile](#)

[More options](#) Dec 30 2010, 3:21 pm

Here is my "take" on the Schroedinger Equation, the basis of Quantum Mechanics.

The first element of the Equation notes a wave function involving the second derivative with respect to time, apparently of Kinetic Energy. The first derivative of Kinetic Energy is Momentum,, and the second derivative, the differential of momentum, would be either velocity or mass, whichever one wished to consider as being a constant. The integrations which would result from working with the second derivatives along the x, y, z coordinates of the basic "Energy Wave" considered in the mathematical conventions of positive numbers with Cartesian Coordinates, when followed logically, describe only one type of unit, albeit in ten dimensions;

[Each double integration adds three dimensions, doing this three times gives nine dimensions, and the combination of the right, up, forward, "positive numbers" conventions adds a counter clockwise twist to the whole thing which adds a tenth dimension of counter clockwise spin. :This could be the general basis for the String theorists idea that the strings slapper into a then d-dimensional hole at 10^{18} -18 cm. which would be about the 4.7×10^{-19} radius which our speculations suggests is the average diameter of the oscillators of our universe..)

This creates a "picture of a model" which is rotating counter clockwise into the octant to the right, up and forward from the chosen origin, So, right at the start, The Wave Function, in this view, is covering only 10/80 of the dimensions of reality, we can go on doubling up, clockwise instead of counter-clockwise, in rather than out, integrating with velocity constant rather than mass, I think I'm up to ten out of 640 at this point, and, I think that I could double up a couple of more times, .In other words, If Schroedinger's Equation be valid as a descriptor, it is of a very limited view of the possibilities.

Anybody out there who is a QM expert, I'd like to hear your comments.

Some ideas for projects, resolutions for this group for 2011...

1. Get this thing some publicity so it will get checked out more widely... Write a short book?
2. Fit the "baryons" etc. for the "Standard Model, Atom Smashing work in ...
3. Extend model beyond Chem. and Physics into Cosmology....
- 4..Accomplish what we can ala the Serenity Prayer. as applied to this stuff!

Happy New Year, Prospero Ano Novo, etc. Eski

Respectfully submitted to Dean L. Sinclair & Oscillator-Substance Theory Group

*** The CERN reactor explosion resulted from a DEFACTO-PLASMA BREACH BLEED THROUGH vortex/eddie quasi-worm-gate-holing FROM PARALLEL----->TACHYON-CARRIER-WAVE(aka) 'Full-DarkEnergy-Torsion Waves'> ('DARKENERGY-TACHYON CARRIER WAVE PLASMA-DARK SPACE').< The bleed-through Dark-space plasma-breach inadvertently occurred within the EYE OF THE high-EM-giga-density//electro-plasmic INDUCTION RING-ARRAY SUPER-MAGNETS. This created a SPONTANEOUS DarkEnergy-TachyonSpace induced 'EVOLUTION' of HYDROGEN & HELIUM. This describes the function of the GRAY-JET subSINGULARITY REACTOR which can be fairly easily affected by adding BOSE-EINSTEIN SUPERCONDUCTOR main-core RING replacing the super-collider open ring-track of a more compact version similar to the general design of current SUPER-COLLIDER TECHNOLOGY, but with a far different end function creating a GRAY-JET ELECTROPLASMIC-SINGULARITY cross-spectrum/cross-dimensional TOROID-VORTEX quasi-worm-hole DARKENERGY bleed-through gate REACTOR.

BOTTOM LINE: The HYDROGEN/H² blew-up and the Helium resultantly DID NOT. They were VERY CLOSE to a FULL ON POTENTIAL FUSION REACTION OCCURRING rather than MERELY a chemical HYDROGEN explosion occuring. And this danger lies in the (quasi-mini-Big-Bang) Phenomenon wherein BLEED-THROUGH DarkSpace/Dark Energy SUPERPLASMA is the ORIGINAL CREATION-BIGBANG-PLASMA that when QUASI-WORM-HOLE ingressing our SPACE-TIME NORMAL DIMENSION spontaneously CREATES HYDROGEN-HELIUM. This same HYPER-GRAVIONIC quasiDARKENERGY FIELD will likewise come PERILOUSLY CLOSE to INITIATING a FULL-FUSION REACTION and is FULLY CAPABLE of SUSTAINING SAME once initiated! This can get a bit DICEY to say the least~;-) A CONTROLLED Electro-Plasmic GRAY-HOLE/GRAY-JET bleed-through reactor would provide AMPLE HIGH-EM-DRAG-COEFFICIENT resistance to PREVENT A FULL-WHITE HOLE PLASMA-BREACH to occur via an UNRESTRAINED INFLOW of DARKSPACE/DARKENERGY. Just a relative 'BLINK' of this occurs as the CENTRE-MUSHROOM CLOUD PILLAR within ANY & EVERY simple either FISSION and/or FUSION DETONATION; although heretofore NOT DEFINED CLEARLY as such.

THE PLASMA-BREACH REACTOR IDEAL is for this quasi-GRAY-HOLE/Electro-Plasmic 'Gray-Jet' bleedthrough hyper-gravionic DARKENERGY/Tachyon-density CARRIER-WAVE field NOT to occur as a ROGUE-ANOMALY TRANSIENT ACCIDENT in ONE OF THE INDUCTION CAROUSEL-RING giga-EM-density ELECTROMAGNETIC-INDUCTION RING/UNITS but rather within THE EYE OF THE ENTIRE 'CIRCLE' of the QUASI-SUPER COLLIDER 'TRACK.' But again, the IDEAL is for the REACTOR to be MUCH MORE COMPACT in CIRCUMFERENCE and a BOSE-EINSTEIN SUPER-CONDUCTOR circle within the INDUCTION CAROUSEL MAGNET-RING ARRAY which will CHANNEL the INDUCER-EM-ELECTRO-PLASMIC FLOW and thusly PREVENT a MINI-PLASMA-BREACH DARKENERGY-PLASMA bleed-though cross spectrum/dimensional LEAK to occur UNCONTROLLED at any given INDUCER RING-ARRAY MAGNET/UNIT.

AND THE REST as follows:

Subject: *Cern Quantum-Grav-Lev-GRAY-JET/(DarkEnergy)SubSingularity-REACTOR-

ONLINE/HADRON Modified-'Super-Collider?' aka Plasma Breach Reactor access 'TIME' & far UNIVERSE

NOTE: The FIRST to the MARK: Will likely NOT BROOK there being any LAST to the MARK; which is the nightmare of the current FISSION AGE. . .

** *GRAVIONICS~via~SINGULARITY PHYSICS/DarkEnergy Accessing/Gray-Jet Singularity GYRO-TOROID/ELECTRO PLASMIC REACTORS~

** *SINGULARITY PHYSICS yields Hyper-Grav/Hyper-Speed Propulsion & LIMITLESS POWER-GRID ELECTRIC via GRAY-JET SINGULARITY Electro-Plasmic GYRO-TOROIDAL FIELD Super-conductor PLASMA-BREACH RING REACTORS* **

NOTE: This project is long since well under way (in the US, UK, Brazil, Russia, & Sweden etc. and your insights, although apt have already fallen to the side. The following is somewhat more technically specific and if you are not already in the loop you might get some 'heads-up' with all of this. The Public-Relations Representatives take the PR-Disclaimer stance of routine PR-scepticism as a function of their paychecks which I fully understand. Your quasi-utopian projections for the 'future' are closer than is commonly/publicly supposed. Unfortunately the 'routine-paranoia' of our Planetary Geo-Political Zeit-Geist currently precludes 'public-fanfare' for what are EXTREMELY PROMISING technical developments which are long-since beyond the early 'blue-print' stages. This is a somewhat 'high-security/high-stakes' affair after all; and such as Danny Wu (Boeing Phantom-Works) etc. and his counterparts (my direct colleagues) in Russia, for instance, have been about this for a considerable-while in man hours to date already. . . Cheers & Best Regards Jack O'Suilleabhain~

*** MOSCOW JUST ANNOUNCED that they have PROVEN DARK-ENERGY ***

*** QUANTUM GRAVIONICS per (Singularity-Physics) : Full-GRAY-JET operating STATUS on the 'Electro-Plasmic-Singularity QUANTUM-GRAV Reactor' HAS BEEN ACHIEVED ***

*** NOTE John Brandenbu...@ORBITEC.com : PARALLEL DARK-SPACE could fairly accurately be characterized as DARK-TACHYON FIELD-SPACE***

PER: Dr. MICHIO KAKU Sept. 10th, 2008// Switzerlands 'New' quasi-HADRON-COLLIDER
PROJECT puportedly gives 'us'(Planet Earth) access to TIME TRAVEL & INSTANT
TRANSIT TO ANYWHERE IN THE UNIVERSE & BEYOND-----WITHIN A
SINGLE YEAR FROM THE PRESENT. . .

??? IS THIS Michio Kaku statement merely Rhetorical & Allegorical FLUFF or is in it fact a
HARD DECLARITIVE STATEMENT announcing the (real-time and already far along in
R&D) INTERNATIONAL DARK-ENERGY ACCESS----PLASMA BREACH/HYPER
GRAVITY PROJECT. . .

INDEED the CURRENT GLOBAL TENSIONS bode for WW-III in the IMMEDIATE OFFING
unless Mankind makes a HARD 180 degree course change for a VERY NECESSARY
population and growth control mechanism rather than PERENNIAL WAR as the NASTY-
SHORTterm-&BRUTAL historical alternative to EXPLORATION & EXPANSION. For even
as these HEADY DEVELOPEMENTS do AT LEAST point to that often rather
CALCULATED SEEMING PROGNOSTACATORY grim-solutions ARE NOW HOPEFULLY
advancing towards SOLUTIONS that rather than PRUNING POPULATION allow for
furthering of more CREATIVE POTENTIALS of HUMANITY are NOT TO BE AMPUTATED
at REGULAR HISTORIC INTERVALS OF MANMADE STRIFE & CATACLYSM. . . And this
too is BETTER NEWS than we have had for some historic 'time' now. . .

*** OUR BETTER LIGHTS ***

*** HADRON//SUISSE: The SUPERCOSMOS//PLASMA-BREACH REACTOR project for
LIMITLESS POWER and VIRTUAL-NO-TIME//&/VIRTUAL NO-SPACE limitless travel is

NOT BRAND NEW but it's time for UNVEILING has NOW PRECIPITOUSLY arrived. This is a GOOD THING! And it is also HEADY to the point of being VERY SPOOKY to CONTEMPLATE. So maybe the 'Mayans' and their 2012 prognostications for the GLOBAL REFURBISHING of HUMAN INTERACTION with (soon defunct) LINEAR TIME LIMITATIONS & LIGHT-SPEED LIMITATIONS were NOT too far off the mark for GLOBAL EVOLUTIONARY QUANTUM LEAP!

WE HAVE for a while now REALIZED that 'Fermi-Collider' was indeed a primitive NEAR PROTOTYPE of a PLASMA-BREACH REACTOR that created a HYPER-GRAV//adjacent space-Dark Energy Toroid which SIMULTANEOUSLY created at its PLASMA-BREACH-EYE-NEXUS a QUASI GRAY-HOLE//WHITE HOLE//Hyper-Grav Worm Hole effect which can BRIDGE SPACE-TIME @ HYPER-FASTER-THAN LIGHT SPEEDS thusly transiting 'Time'(backward/forward) with relative ease & SPOOKY ACTION @ DISTANCE transit also the SPAN OF MULTI-UNIVERSES-----VIRTUALLY INSTANTANEOUSLY. . . .

??? TALL ORDER ??? WAKE UP: WE ARE ON THE VERY VERGE OF PERFECTING this subsingularity-DarkFlow technology IN CERN-SWITZERLAND(to the tune of limitless funding) as well as MANY LOCALES GLOBALLY including the DarkEnergy/DARK FLOW Projects Centres of the U.S., UK & Russia etc. . . . The fairly simplistic KEY to achieving this breakthrough is the adding of a SUPERCONDUCTOR CORE within the normal 'track zone' circular collider core of the heretofore FAIRLY COMMON HADRON COLLIDER design. . . High Density Field Physicists along with the original design & construction collider ELECTRICAL ENGINEERS would be the obvious team to make ALL THE ABOVE a FACT. AND it is fairly obvious that a 'more compact' design with a relatively higher-diameter (thicker) SUPER CONDUCTOR HIGH DENSITY TORIOD-FIELD RING CORE within the HIGH-DENSITY EM-INDUCER ARRAY would be adequate to JUMP START the ADJACENT-SPACE/DarkEnergy/PARALLEL SPACE Gyro-toroidal Field. And thusly would the SUBSINGULARITY (eye)ZONE elicit the CROSS SPECTRUM HighDensity sub-DarkEnergy AXIAL INDUCED FLOW GENERATIVE FUNCTION of the REACTOR. Thusly is CONNECTED(quasi-wormholed DARK ENERGY PARALLEL SPACE to the AXIAL FIELD BLEEDTHROUGH EYE zone of our DARK FLOW EM-INDUCED Gyro-toroid-PLASMA BREACH SubSingularity Reactor.

*** AS WITH A CLUTCH & PRESSURE PLATE AFFECT: Cross-Dimensional/Cross-Spectrum HIGH-DENSITY FIELD VISCOSITY allows the INDUCED SUB-SINGULARITY, Gray-Hole, PLASMA-BREACH quasi-worm hole to be established.

THE PERPENDICULAR AXIAL FIELDS are simultaneously HYPER GRAVIONIC and tend to DRAW DOWN(lobulize themselves) via their OWN HYPER GRAVIONIC ACTION of the Axis Field upon itself. AND THIS into FOCUSABLE HYPER GRAVIONIC LOBES axially through the eye-breach centre perpendicular to the plane of the SUPER CONDUCTOR gyro-toroid/induction RING ARRAY of the REACTOR.

PROPULSION LOBE: CONCENTRATING the hyper-gravionic/hyper-dense AXIAL LOBE FIELD by deflecting it AND THUS DOUBLING IT 'above only' the ring-array plane is desirable AS FOR PROPULSION by using ALUMINUM ALLOY DEFLECTION- Concave Axial Field deflection beneath the Reactor Ring-Array/plane can induce-foculize-focus said axial-jet field as a POINT-LEAD HYPER GRAVIONIC focused field lobe PROPULSIVE MECHANISM to MONO-DIRECTIONAL ACTION. Said propulsive mechanism depending on the RELATIVELY LESS-DRAGGED REACTOR FIELD has nearly LIMITLESS ACCELERATION potential. And that field opened above/in front of a NON-STATIONARY REACTOR (within a mobile craft) would tend at sufficiently sub-SINGULARITY EYE-OPENED INTENSITY to surround said craft/reactor in motion within a SUBDIMENSIONAL-SPECTRUM DISPLACED FIELD. AND THIS would tend to render SAID CRAFT/REACTOR to be within a FIELD-POD which would function as having the craft/reactor within it's own OUTSIDE-INERTIA-IMMUNE----->MINI-POD UNIVERSE.

THE ABOVE Craft/Reactor in motion would in point of fact be OPENING A DIMENSIONALLY DISPLACED-zone WORM-HOLE just AHEAD of itself and closing said worm-hole just BEHIND itself. Its progress would thusly be rendered TIME-IMMUNE IN TRANSIT and likewise would tend to with every FIELD COLLAPSE INDUCTION-DRAG PULSE of the Reactor in PROPULSIVE-GENERATIVE pulse-mode to RATCHET SOMEWHAT AGAINST THE FORWARD FLOW OF TIME ITSELF.

*** REMEMBER THAT Parallel DarkEnergy Space is HYPER-GRAVIONIC, & HYPER-ENERGY FIELD SPEED-DENSE, & HYPER FLUIDIC eg. 'fast' beyond imagining nearly. This field is 'DARK-SPACE' in a state and 'speed' of VIRTUAL NO-TIME, & VIRTUAL NO-DISTANCE.

AND THUSLY would a total SPACE-TIME DIMENSION EXIT-SLIP(into DarkSpace within the protective reactor field-envelope) tend to MAKE A MORE PROFOUND BACK-RATHCET INTO SPACE TIME NORMAL upon returning by powering down/closing the breach of our Gray-Hole, Sub-Singularity, Gyro-Toroid, PLASMA BREACH REACTOR.

SINCE A FULL SLIP MODE WOULD BE MOVING at SPEED-VIRTUAL NO-TIME/VIRTUAL NO-DISTANCE a FULL SLIP JUMP would by virtue of SPOOKY ACTION AT A DISTANCE tend to take us GALACTICALLY FAR FARTHER THAN WE MIGHT WISH TO GO----- --VIRTUALLY INSTANTLY. . . And in light of this, a SUB-SLIPPED(merely slightly SPACE-TIME DIMENSIONALLY-SPECTRUM DISPLACED mode might be MUCH EASIER TO NAVIGATE & CONTROL and MOVE US ABOUT our SOLAR SYSTEM & BETWEEN GALAXIES in still VIRTUALLY INSTANTANEOUS SPEEDS. eg. WARP SPEED is ALREADY OBSOLETE.

NOTE: Our Bagel-Ring Reactor~;-) EM-Gyro-Toroid Gray-Hole sub-Singularity DARK ENERGY-DARK SPACE accessing PLASMA BREACH REACTOR will require NOTABLE GIGA-DENSE starting EM-INDUCTION inputs in the START PHASE. But when the PARALLELL SPACE DARKENERGY parallel gyro-toroid has been appropriately KICK-STARTED(the cross-spectrum clutch & drag pressure plate effect) & THE DUEL EYE FLOW Dark energy flow is established; THEN OUR REACTOR MUST BE SUITABLY ENGINEERED WITH A SUFFICIENTLY POWERFUL VARIABLE DRAG COEFFICIENT to THROAT-DOWN(throttle-down) the SUB-Singularity SO THAT IT DOES NOT RUN AWAY to FULL WHITE-HOLE STATUS. . . .

BIG HOWEVER: The gate-field should NOT BE DRAG-SLAMMED SHUT precipitously as a SUDDEN MEGA-DRAG communicated through the EYE-FIELD QUASI WORM-HOLE would tend to TOO SUDDENLY COLLAPSE the PARALEL SPACE DARK ENERGY parallel gyro-toroid field and UPON THE DARKenergy TOROID'S COLLAPSE upon its EYE ZONE would tend to create a BRIEF BUT DEVASTATING WHITE-HOLE JET into our SPACE TIME NORMAL SPACE which would DESTROY THE REACTOR which is MUCH LIKE THE ORIGINAL BIRTH MECHANISM OF OUR 'BIG-BANG BIRTH'. . . . Thus is the DarkSpace collapsing Super-Gyro-Toroidal Maelstrom precipitous COLLAPSE like a super-cosmic DarkSpace PISTOL SHRIMP FIRING analogy of the BIG BANG formation out of Parallel & Adjacent DarkSpace.

****BUT DARK ENERGY FLUID DYNAMICS OBIATES any 'BIG CRUNCH.'**

But if a PRECIPITOUS EYE-GATE FIELD COLLAPSE did occur THEN SUBSEQUENTLY if within the atmosphere, THE DARK ENERGY WHITE-JET would INDUCE A FORMIDABLE FUSION REACTION that would mimic TUNGUSKA 1908.

AND TESLA @ Wharton Cliffs NJ-USA Toroid Generating Tower circa 1908 likely UNINTENTIONALLY generated by a ELECTRO-MAGNETIC METEOR/ FREE-ARIAL BROADCAST (frisbee-like) EM-GYRO-TOROIDAL FIELD which TESLA by GENERATING INADVERTANTLY moments before TUNGUSKA-1908 caused to travel AERIAL BROADCAST wise via the GLOBAL EM-FLUX FIELDS to SPEED-OF-LIGHTENING(1/2 light-speed) across the pole to CONNECT-GROUND WITH A LIGHTNING STRIKE from the GEO-MAGNETIC planetary field and which catastrophically PAROXISMALLY AMPLIFIED that accidental TESLA FREE ATMOSPHERIC EM-GYRO TORIODAL(frisbee-field). AND THAT for a fateful instant opened to FULL WHITE-HOLE STATUS and thereby WHITE-STATUS BLEED-THROUGH DARK-ENERGY induced said TUNGUSKA-UPPER-ATMOSPHERIC FUSION REACTION.

NOTE: The Reactor DRAG-COEFFICIENT CONTROL MECHANISM must perform be FAIL SAFE & IDIOT PROOF; possibly by having a REVERSE-AGAINST-FLOW FIRING ARRAY of a MEGA-CAPACITOR BANK & also with ENOUGH BACK-UP CAPACITOR-ARRAY to RECHARGE the INITIAL ARRAY before the LAST BRAKING ARRAY has been via 'SLOW SEQUENCE' gradually bringing any SURPRISE DARK ENERGY FIELD 'KICKS' under CONTROL. Far better safe than sorry.-----> BUT IF WE MASTERED FUSION we can MASTER THIS VIRTUALLY LIMITLESS POWER GENERATING & PROPULSION POTENTIAL Dark Energy Accessing Technology.

-Respectfully submitted-

*PARALLEL(parent) DarkSpace~IS~TACHYONCarrierWaveDARKENERGY

*** TACHYON SPEED-DENSITY CARRIER-WAVE SPACE is 'AEXOVERSAL SUPER-COSMOS DARKSPACE' and is most simply DARKENERGY SPACE: This is 'high-speed-density' space whose 'density' is hyper-fluidic at density that makes 'mass' seem like vapor and whose 'relative-speed' moves at rates that makes vast distance beyond the span of 'several universes' crossable virtually INSTANTANEOUSLY. This is the 'parent' of 'Spooky action at a Distance.'

PROBLEM: ?How do you measure the SUPER Speed-Dense TACHYON CARRIER WAVE of the infinity of ALL WAVE LENGTHS within the vast spectrum array of the SUPER COSMOS?

?HOW DO WE 'MEASURE' the 'wave-length' of a DarkEnergy M-Brane/SUPER WAVE that propagates at a rate EXPONENTIALLY FASTER than the Speed of Light?

AND THIS TACHYON DARKWAVE will be/is the PARENT DARKENERGY SPEED-DENSITY MEDIUM of EVERY OTHER POSSIBLE lesser-speed-dense 'wave-length' that can or every will exist.

THIS TACHYON speed-density DarkEnergy WAVE SHEET thusly is ubiquitously infinite and moves SO-FAR/SO-FAST that its VERY WAVE CREST TO WAVE CREST 'vertically' spans 'distances' VIRTUALLY INFINITE relative to our ability NOT to be able to measure; and barely even 'guesstimate.' AND 'LATERALLY' the Wave-Trough would be of such SHORT INTERVAL as to be again 'virtually immeasurable. . . AND & UBIQUITOUSLY PRESENT. Hense the EVIDENCE of the OMNI-PRESENT 'Super-M-Brane TACHYON DARKSPACE FIELD bleed-through has been 'hiding in the weeds all along. AND THUSLY the WAVE DISPERSION appears VIRTUALLY SOLID like a child scribbling vigorously with a black-crayon until the WAVE PATTERN looks and IS virtually undetectable from being A SOLID BACKGROUND SHEET.

BUT THIS TACHYON-DARKENERGY MEDIUM is (parent)SUPER-COSMOS INFINITE DARKSPACE itself whose SUPER-SPEED-DENSE-WAVE-LENGTH we percieve on our devices as a MERE UNI-SHEET OF BACK-GROUND NOISE. And thusly to-date/so far been missing the trees for the INCREDIBLY DENSE & UBIQUITOUSLY PRESENT forest.

Since this DarkEnergy TACHYON SUPER SPACE MEDIUM is the source and sustaining CARRIER-WAVE MEDIUM of the virtually infinite-in-number champagne LOW WAVE-LENGTH SPEED-DENSITY bubble-universes such as our own; IF in an 'imaginary scenario' the DARK-ENERGY TACHYON-SUPER-CARRIER-WAVE Super M-Brane of infinity were to CEASE, then ALL OTHER ENERGY FIELDS WOULD LIKEWISE evaporate. But so much for Sci-Fi.

TACHYONS in 'fiction' as meandering herds of 'GRAVITON-PARTICLES' is a NON-STARTER.

But within our discoveries of ubiqi tous DARK-ENERGY as the TACHYON SPEED-

DENSITY SUPER M-BRANE CARRIER WAVE; such will will provide the answers we have long sought to such as ZPEnergy & the technologies of the future we as humanity SO LONG FOR. . . . Jack O'Suilleabhain

JAPANESE FAN illustration of the OMNIPRESENT TACHYON CARRIER WAVE and 'PARALLEL MULIT-TIME COMPRESSING hyper-grav tube/worm-holing WARP drive ACROSS the WAVE

TOUCHE' Steven: Laughing is making my coffee run out my nose!~;-) And yea, you're very correct: FEWER words are better; but I'm kind've fusing & patch-working various theory. And like is common to 'German' expression I tend to fuse many words & concepts into a 'super-string' which makes my writing look like the town-name at a Train-station in Wales~;-) And I'm constantly pushing the tediously-verbose boundary as I'm well aware. . . and being brought back down to 'earth' is a good thing!

The idea of a SUPER-MEMBRANE transdimensional-unisheet as a TACHYON CARRIER-WAVE of Dark-Energy is obviously my 'pet' idea; but hardly unique to me of course. Cudo's to the originators. . . of the various aspects of both 'Super-Gravity' theory & 'M-Brane' theory. . . and variants of Super-String Theory.

And visualizing the 'SUPER-WAVE' as a corrugated accordion-like or Japanese-fan type of configuration is the simplest way I can say it.

Then with each SUPER-WAVE-RIDGE representing an ascending-and/or-descending time-gradient of quasi-parallel experiential existence; the picture is pretty well complete.

AND FINALLY: If a hyper-grav wormholing as basically a type of tunneling-'warp' drive were employed to cross-the quasi-parallel space-time corrugations of the Super-Sheet; yet slightly 'different' & before or after in relative 'time' sequence). It would thus compare to the 'craft' as a 'needle' passing it's hyper-grave wake as 'thread through the SUPER-SHEET wave-corrugations. And thusly it would tend to draw them/compressing them together. This would tend to elicit a somewhat weird temporal & perceptual 'time'-sequencing 'deja-vu'-set of distortions for our ourselves & 'parallel' selves in our adjacent 'space-time variant corrugations.'

And then NOT discounting that we likely would all tend to have a quasi-remotely viewed/telepathic gestalt-link to our adjacent-parallel selves in those parallel/adjacent time-line/universe-lines; then the perceptual confusion/distortion would be even more compounded.

Thanx~JO

Respectfully submitted to Dean L. Sinclair & Oscillator-Substance Theory Group

*BOSE-EINSTEIN SUPER CONDUCTOR TOROID RING REACTOR access DARK-ENERGY/parallel-DARK SPACE aka 'TACHYON CARRIER-WAVE SPACE'

*** The RACE is AFOOT in DarkEnergy Technology R&D and the LOSERS will be LOSING for a VERY LONG TIME *** as per 'TIME' in the aspect as of TRANSTEMPORAL/TRANDIMENSIONAL-SINGULARITY PHYSICS availing to us the 'hard-technologies' that access to us as 'Exponentially Faster-Than Light' Transdimensional-Displacement Propulsion AND TIME-MOBIUS/TEMPORAL SLIP EFFECT technology per accomplishing DARK-SPACE/TACHYON SPACE accessing GRAY-JET TOROID ELECTRO-PLASMIC super-conductor ring reactors. Think 'compressed' super-collider technology BUT with a fairly 'thick' BOSE-EINSTEIN-superconductor RING-CORE, rather than a 'particle-track.'

~*~NEWTON is LEFT HITCH-HICKING~*~

Anita @ Boeing Phantom Works: Since 'Spooky action @ Distance' is a Proven; and Russia has created a functional DARK ENERGY PROVING Gray-Jet electro-plasmic subSingularity PLASMA-BREACH Reactor(replete) with focusable AXIAL HYPER-GRAVITY bleed-through LOBULAR FIELD-perpendicular-axis---->Newton becomes thusly at somewhat of a distinct disadvantage as we're making his APPLE FALL UPWARD. . .

In addition: EUROPEAN SCIENTIST Joachim Hauser has PROVEN the existance of TORSION-WAVES that move at SPOOKY ACTION @ DISTANCE HYPER-SPEED aka 'VIRTUAL NO-TIME SPEED' through PARALLEL AEXO-DarkSpace. . . And thusly Hauser's discovery has rendered the VERY PREMISE of FRANK DRAKE's 'SETI' as already obsolete since Light-Speed Radio Waves would simply NOT be the mode of COMMUNICATION of likely SPACE-TRAVELERS. These would have long since harnessed EINSTEIN-ROSEN BRIDGE travel that the EXTENDED EINSTEINIAN theories and ENGINEERING CONCEPTS that have been articulated by myself and others which HARNESSING PARALLEL AEXO-DarkSpace Bleed-through Fields avails us the FOCUSABLE HYPER-GRAVITY FIELD craft surrounding & defacto worm hole establishing propulsion which accomplish the afore stated fairly handily. Displacing a craft within it's Reactor Hyper-Gravity Field renders it a mini-psuedopoidal-universe bubble able to move within the HYPER-SpookyAction- VIRTUAL-NO-TIME SPEEDS of AEXO-DarkSpace.

Navigation control so as to not 'over-shoot' targeted destination would be the biggest problem. And controlling the reactor to be merely PARTIALLY DISPLACED from Space-Time Normal would likewise still avail us the benefits of DEFACTO WORM HOLE SPACE-COMPRESSION travel at speeds far out stripping LightSpeed in INTERTA IMMUNE reactor field encapsulated craft.

From some of the statements of John Brandenburg/ORBITEC his concept of TACHYON FIELDS is the very same as what I've referred to as these BLEED-THROUGH AEXO-DarkSpace Hyper-Gravity Fields. In effect the concepts are interchangeable & IMMINENTLY FUNCTIONAL. And Brandenburg's references to these concepts indicate that he is likely aware of R&D that

you have not as yet been brought into the loop in regards to.

IN SHORT: Parallel-adjacent AEXO-DarkSpace is indeed TACHYON-FIELD SPACE.

YOU WROTE///Jack--

There's a lot of theory here. What are the "goes-intos" and "goes-out-ofs" for this propulsion system? Using Einstein, do we still need some Newton to move a spacecraft from one place to another?

Anita &

*****DEFINING & ACCESSING DARK-ENERGY*****

RE: KEY ALTERATION of SINGULARITY PHYSICS uniting RELATIVITY to QUANTUM PHYSICS: Regarding alteration of the Einstein equation: if M is the same and c is the same, but E is different, then it would probably be wise in your altered equations to show a different symbol for the kind of E being referred to in each context. I'm in the aerospace industry, where multi-million-dollar missions have been lost because people didn't realize some of the team were working in metric units and some were working in English units; I can see Physics getting similarly confused if there's more than one definition matching the symbol E. Perhaps something like {E} would be compatible with all keyboards but make the symbol distinct from the Einstein E for 'E'nergy.

*****AND THIS IS A DISTINCTION for the ELECTRICAL ENGINEERS facilitating their accessing of DARK-ENERGY/AEXO-DarkSpace TECHNOLOGIES*****

If Danny Wu is not talking to you &/or if you are not in the loop nor on the R&D team then I understand that you're playing 'catch-up' here. Chief-Scientist/Project Coordinator Danny Wu/Phantom Works is the 'go-to guy' in your immediate chain of command. Check it out. - JO'Suilleabhain/O'Sullivan

OF THE BIG BANG SINGULARITY which 'BORNED' our GREEN BUBBLE UNIVERSE from PARENT

DARK-ENERGY INFINITE AEXOCOSMIC DARK-SPACE. . . aka AEXO-DarkSpace.

AND THIS RISES as a NORMAL PROCESS of the BASE AMBIENT DARKENERGY of AEXO-DarkSpace which is the basis discovery concept FINALLY DEFINING Einstein's- Cosmological-Constant' which has a root-mobius formula of the BIG BANG instantaneous BUBBLE UNIVERSE expansion rate formulated as ENERGY SPEED-DENSITY FORMULA:

*** Speed of Light Cubed-(C^3ubed) SPEED X Interstellar space Base-Ambient Speed-Density as ONE-ENERGY-(1'E) divided by Speed of light Cubed----->(E/C^3)DENSITY ergo:

~the BIG BANG EXPANSION SPEED-DENSITY RATE= C^3ubed SPEED x E/C^3ubed DENSITY~ which moves as HYPER-TIME Speed-Density Expansion Rate. . . thus is the ROOT FORMULA of the COSMOLOGICAL CONSTANT. . . .

COSMOLOGICAL CONSTANT AEXO-Dark Space= EC^3ubed: FOLLOWING as 'one' through 'four' in the articulation of UNIVERSE CREATION out of AEXO-DarkSpace HYPER-SPEED-DENSE current dynamics.

AEXO-DarkSpace @ EC^3ubed FRACTALLATING HYPERDYNAMIC (wild) current dynamics of said DARKSPACE-AEXOCOSMOS has it's base ambient speed-density as AEXO-DarkSpace @ (AEX=EC^3ubed). Our Newly born Bubble Universe was INFLATED via AEXO-DarkSpace super-plasma VIA the ingress BIG BANG AEXO-DarkSpace-GYRO-TOROIDAL-Singularity and that FIRST INFLATED our BUBBLE UNIVERSE. This birth-singularity would be a WHITE-HOLE from the NEWLY-FORMED BUBBLE UNIVERSES 'point of view.'

#1. This BASE-Ambient COSMOLOGICAL CONSTANT of the BIG-BANG is thusly:ONE-ENERGY INTERSTELLAR SPACE as 1'E'nergy={C^3ubed) SPEED x 1'E'/C^3ubed DENSITY} mobius fashion formulates (again) the 1'E'nergy Instellar Space speed-density . which is the HYPER-TIME RATE base ambient EXPANSION RATE @ virtually INSTANTANEOUS EXPANSION/INFLATION RATE of the BIG BANG. . . AND the BIG BANG is a Bubble-Universe-forming SINGULARITY via the eye of a DarkEnergy/AEXO-DarkSpace EYE-singularity-LOW-SPEED-DENSE centre of a routine AEXO-DarkSpace GYRO-TOROIDAL MAELSTROM.

And from our BUBBLE UNIVERSE SIDE said singularity OUT of AEXO-Dark-Space is a MEGA-WHITE-HOLE creation singularity INTO OURSPACE. And again the INJECTED super-plasma out of AEXO-DarkSpace expands the BUBBLE instantaneously at the HYPER-TIME-RATE of 'Base-Ambient ONE-'E'nergy Interstellar-Bubble Membrane Space'= 1'E'= C^3ubed SPEED(of expansion x E/C^3ubed HYPER LOW DENSITY primal MEMBRANE-SPACE-----DENSITY. . . ~

add to that, the EINSTEIN REVISION #2. 'M'ass=1'E' x C^2quared, (or), 'M'=EC^quared. . . rather than the more familiar E=MC^2quared. This would also function as 'M'=EC^2quared as the Base-energy Speed-Density of the HYDROGEN-ATOM.

add to that redefining the 'Zero-Point' of Feynmans ZERO-POINT ENERGY eg ZPE is simply 1'E' Instellar-space Membrane: #3. 1'E' @ C(light-speed)=EC=LIGHT, or(EC=Light) 'or' 1 base ambient interstellar 'E'nergy(which is cross-equivalent to Feynman's conceptual-ZPE/ZeroPointEnergy) then accelerated to Light-Speed takes the speed-density spin-twist form as HELICOID-WAVICLE-LIGHTSTRING which classically we interpret as WAVE &/or PHOTON-PARTICLE(One WAVE/wave-crest to wave-crest= ONE QUANTUM-PHOTON) simultaneously both WAVE as well as PARTICLE-INPACT-WAVE SEGMENT.

add to that #4. 'One-Hydrogen Electro-valent-shell(icle)Field' = ONE QUANTUM ELECTRON(QE) @ speed-density QE= (EC/2)^2quared 'or' (1'E'nergy x Half-Light-Speed)Squared

*** Thus are (roughly) the FOUR-PHASE PARAMETERS of the EINSTEINIAN COSMOLOGICAL-CONSTANT ***

*** The COSMOLOGICAL CONSTANT Overview: WE ARE ONE CHAMPAGNE BUBBLE Universe among INFINITE MYRIADS of like BUBBLE UNIVERSE'S

SUCH AS OURSELF being CONTINUALLY BORN at the heart of DARKSPACE super-eddie gyro-toroidal

MAELSTROMS that open LOW-DENSITY SINGULARITIES at their EYE-Centre-Points which form the BIG-BANG

BUBBLES of said UNIVERSES.

THE SIMPLE FORMULA RATIO 'constant' that controls ALL RELATIVE 'TIME' & GRAVITY which in-turn determines

their mass/energy flow/& relative 'time' dynamics is that the ORIGINAL BUBBLE that forms the ONE-'E'energy MEMBRANE SHEET of INTERSTELLAR SPACE IS ratioed THUSLY:

***** The Base-Ambient-Universe ONE-ENERGY@'1-E' energy MEMBRANE formulates as--> $1'E = C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$. And by this formula-ratio which at $C^3 \text{ubed SUPER-SPEED FORMS}$ the ENTIRE atom-mass EMPTY ENERGY-BUBBLE within a SINGLE SPLIT-INSTANT.

AND WITHIN THE NEXT INSTANT: then our NEW-EMPTY BUBBLE UNIVERSE is then recipient to a centre-bubble injection via the 'AEXO-DarkSpace birth SINGULARITY of the PRIMAL Sub-AEXO-base ambient MINUS- $C^3 \text{ubed}$ super-plasma WHICH creates a SUPER-SPAGHETTIFIED EC^2 (atomic mass speed-density(Hydrogen)) Helicoid Wave-string UNIVERSE CENTRAL NEBULA which is the STAR-BIRTH ROOKERIE of GALAXIES. The $EC^2 \text{quared}$ Helicoid Wave-string segments to PROTON DENSITY SEGMENTS that immediately hyper-collapse and form ALL PROTONS as BALANCED-GRAY-JET micro-singularities replete with AXIAL FLOW ELECTRO-VALENT SHELLS making EACH PROTON a Gray-Jet Singularity System PERENNIALY FED by/linked to PARALLEL AEXO-DarkSpace as the UBIQUITOUS DYNAMO Back-Of-The-Tapestry ENGINE of ALL COSMIC PHENOMENA.

AGAIN: INITIALLY THE AEXO-DarkSpace Parent BIG-BANG SINGULARITY COLLAPSES when it's DARKSPACE MAELSTROM, by SINGULARITY DRAG, then super COLLAPSES injecting super-plasma becoming said ATOMIC HYDROGEN DENSITY BIRTH-NEBULA. And that original INJECTED SUPER-DARKSPACE-PLASMA instantly SPAGHETTIFIES into MASSIVE wavefront expanding clouds of $EC^2 \text{quared}$ (approx.) HELICOID WAVE STRING which segments to HYPER-SNAP DOWN to form HYDROGEN PROTONS AS GRAYJET MICROSINGULARITY ELECTRO-VALENT SYSTEMS; with are HYDROGEN ATOMS.

*Base Ambient 'HYPER-TIME' rate of Space-Time 'E'-MEMBRANE: THE FURTHER evolution of galaxies PROCESS WE HAVE PRETTY WELL NAILED DOWN(Silk, Reiss, Woosley, & Perlmutter, etc.) as the GALAXIES ACCELERATE to the outer AEXO-DarkSpace BUBBLE BORDER that the GREEN-'E'energy Space-Time 'MEMBRANE-Sheet' flows perennially into @ $C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$. This is ONE-'E'nergy Space-Time @ HYPERSPEED which is more easily just designated HYPER-TIME.

HENSE the GREEN-MEMBRANE 1'E'nergy BUBBLE expaned @ the SPEED of LIGHT CUBED or simply $EC^3 \text{ubed}$.(on this key-board~;-)

THIS SIMPLY MEANS that THE ORIGINAL $1'E = C^3 \text{ubed SPEED} \times E/C^3 \text{ubed DENSITY}$ interstellar membrane MOVES @ HYPER-TIME progression-rate @ $C^3 \text{ubed}$.

*BIO-PLANETARY GRAVITY-level 'TIME' rate: AND @ $EC^2 \text{quared}$ HYDROGEN-ATOMIC MASS ultimately creates the BIO-PLANETARY SPEED-DENSITY MASS that we know as OUR VERSION of slower NORMAL-TIME but a HIGHER-MASS-DENSITY.

OR-->TIME-FLOW-RATE is the relative INVERSE PROPORTION of Atom-MASS SPEED-DENSITY to MEMBRANE-InterStellar SPACE-TIME flow SPEED-DENSITY.

EVEN MORE EASILY STATED: MASS SPEED-DENSITY = GRAVITY that as SPEED & THUSLY DENSITY INCREASES as MASS ACCELERATES(and thus densifies increasing 'gravity') ----->GRAVITY INCREASE WITH MASS DENSITY inversely MAX-SPEED HYPER-TIME of the Interstellar-Space-Time GREEN-'E' MEMBRANE.

AND AGAIN: THE HIGHEST TIME FLOW RATE is the GREEN-'E'-Membrane @ $C^3 \text{ubed SPEED} \times E/C^3 \text{ubed Density}$.

*** MASS-GRAVITY = 'ENERGY SPEED-DENSITY.' ALL WAVE-STRING (all 'wavelengths' in the SPECTRUM) ACCELERATE on the ENERGETIC 1'E'-GREEN-MEMBRANE via the NATURAL SPIN-TWIST property of ENERGY ----->ALL ENERGY is perennially

accelerating & densifying UP THROUGH THE WAVE-LENGTH SPECTRUM SCALE and thus continually further gaining the SPEED-DENSITY PROPERTY of the CONSTANT REELING-IN and LOCALLY-COMPRESSING the SPACE-TIME GREEN-1'E'-MEMBRANE. This is EINSTEIN and PROVEN.

*** THE PERENNIAL 'outward' ACCELERATION is due to HYPER-SPEED DENSITY @ C^3bed of outer AEXO-DarkSpace so that ATOM-MASS locally Space-Time reeling-in & COMPRESSING & outer AEXO-DarkSpace from the surrounding BUBBLE-UNIVERSE-BORDER constantly Space-Time reeling-in & compressing ARE PLAYING A CONSTANT TUG-of-WAR which is CONSTANTLY tending to ACCELERATING Atom-MASS on the perennially out-flowing Space-Time Green-'E'-Membrane as THIS EFFECT CAUSES A CONSTANT DIALATION of PROTON-GrayJet Micro-Singularity EYE-CONNECTION also thus internally to AEXO-DarkSpace causing further SPEED-DENSITY in THE ATOM-FIELD which inturn COMPRESSES FURTHER Ambient 'E'-membrane SPEED-DENSITY SPACE-TIME WARPAGE locally.

*** THUS GRAVITY is DEFINED ULTIMATELY as a function of AEXO-DarkSpace: AEXO-DarkSpace surrounding our GREEN-'E'-MEMBRANE Space-Time PULLS UNRELENTINGLY to the AEXO-DarkSpace Gray-Jet Micro Singularity FIELD of ATOMIC-PROTON-Electro-Valent MASS much in a AGONISTIC-ANTAGONISTIC push pull of VIRTUALLY ALL PLANETARY & COSMIC NATURAL SYSTEM-PHENOMENA.

* GRAVITY more briefly is the affect of that ATOM-PROTONS tornadically SPIN-UP and DENSIFY the AMBIENT-1'E'energy MEMBRANE & thusly INCREASE their relative SPEED-DENSITY MASS and thus GATHERING other SPEED-DENSE adjacent ENERGY FIELDS & ATOM-MASS.

** *ACCELERATING GALACTIC-MASS moves to merge ultimately with the HYPER-FLUIDIC SPEED-DENSITY of AEXO-DarkSpace @ C^3bed which is VIRTUAL-NO-TIME aka the simple CANCELING OUT of the 'TIME' effect of LOWER SPEED-DENSITY BUBBLE UNIVERSE fluid-dynamic systems.

THUSLY AS WE TAP AEXO-DarkSpace and use ELECTRO-PLASMIC-BREACH GRAYJET REACTOR FIELDS to SURROUND such reactor POWERED CRAFT; then MOVING WITHIN the HYPER SPEED-DENSE DarkSpace PARALLEL SPACE FIELD makes us IMMUNE TO THE RELATIVE MOVEMENT OF 'TIME' & also INERTIA-IMMUNE as we've created our own mini-poidal psuedo-bubble universe TO BE PROPELLED @ 'VIRTUAL NO-TIME' virtually infinite speeds.

AS THIS IS A HYPER-GRAVITY point lead FOCUSED FIELD we move within a VIRTUAL WORM-HOLE/WORM TUBE which is OPENING JUST AHEAD of the craft & CLOSING JUST BEHIND same.

FROM THE VANTAGE OF AEXO-DarkSpace DISPLACEMENT 'time' is a symptomatic incidental with the LOW SPEED DENSITY BUBBLE UNIVERSE as a mere function of LOW-SPEED density vs. speed ratio dynamic. ALSO THE BUBBLE UNIVERSE is A QUASI-SINGLE-Cell fluid-dynamic ORGANISM filled with INTERIOR-COSMIC ORGANELLES with EXCHANGE ENERGY & INTERREACT via the UNBIQUITOUS-GREEN Energy SPACE-TIME MEMBRANE.

!!! HERE IS THE KICKER !!! ALL SO CALLED 'TIME' is ONE INTER-REACTIVE interwoven SKEIN of CONTUGUOUS ENERGY FLOW-currents-threads within the MEMBRANE. THE BUBBLE BEGINS & it's ENERGY-FLOW reconnects perennially BACK into VIRTUAL NO-TIME AEXO-DarkSpace where TIME IS IRRELEVANT. AND from AEXO-DarkSpace VIRTUAL-NO-TIME the BUBBLE and ALL ITS CURRENT DYNAMIC PROCESSES are CONTIGUOUS & SIMULTANEOUS and thusly ANY MOMENT IN TIME is PERENNIALY 'TOUCHABLE/REACHABLE' from a 'craft' within the AEXO-DarkSpace C^3bed SPEED-DENSITY FIELD @ VIRTUAL-NO-TIME.

OOPS: Our Universe is a SINGLE 'mortally-limited' FINITE bubble COSMIC MACRO-ORGANISM: All Space & Time is ONE SINGLE EXANT-MOMENT of ENERGETIC INTERACTION. . . WE ARE A COSMIC BACTERIA. . .

TIME-MACHINE: FROM AEXO-DarkSpace, HYPER-GRAV TUBE Gray-Jet Singularity Reactors can TOUCH ANY POINT ON THE SPACE-TIME MEMBRANE WITHIN THE GREEN-1'E'-BUBBLE because, from the VANTAGE POINT of AEXO-DarkSpace ALL TIME is ONE-SINGLE MOMENT of ENERGY REACTION and FORWARD & BACKWARD in 'TIME' are largely INCIDENTAL IRRELEVANCIES and NOT A LIMITATION to ACCESSING ----->what we see as ANY-TIME or ANY-PLACE!

ANY POINT is ACCESSABLE in our 'BUBBLE UNIVERSE'S RELATIVE-SPACE-TIME-GREEN-MEMBRANE' because; as we see, 'SPACE-TIME' is FINITE having a 'BIRTH

POINT-Birth Moment' and also has a GREEN-Membrane FINAL DESTINATION.
AND THUSLY 'SPACE-TIME' has a DIRECTIONAL FLOW & simple BEGINNING &
ENDING parameters. Simply put; our Bubble-Universe is NOT FOREVER. . . . though
AEXO-DarkSpace IS; more or less!~;-)

AND THE AEXO-DarkSpace SUPERCOSMOS is INFINITE where 'TIME' itself is NEITHER
EXTANT nor RELEVANT which makes even the term AETERNAL to be of NO PRACTICAL
EMPIRICAL VALUE.

*** THE 'NUCLEUS' of our GREEN-1'E'-membrane BUBBLE UNIVERSE as BACTERIA:

THE POINT-CENTRE GALAXY-BIRTH NEBULA formed when the original BIG-BANG
COLLAPE-INJECTION BIRTH SINGULARITY #1 formed the 1'E'-GREEN energy BUBBLE;
then #2 received the BIRTH-Super-Plasma Injection; then #3 REBOUNDED from the
collapse forming a REBOUND GRAY-JET SINGULARITY. The ASSISTING-dynamic RE-
IN-PULL came from the OUTER-BUBBLE-BORDER dynamic FLOW-TENSION on the
OUT-FLOWING GREEN-'E'-Membrane THEN FORMING that (now)t REBOUND GRAY-
JET GALAXY-ROOKERIE-NEBULA perennial BIRTH FOUNTAIN @ CENTRE UNIVERSE.

THE
WAVE-LENGTH-'GRAIN' of perennial 1'E'-MEMBRANE out-flow moves CONSTANTLY
'outward' to the DARKSPACE BORDERS THAT GALAXIES ACCELERATE TO
CONSTANTLY. AND when EC^2 qured-MASS galaxies accelerate to 'C' lightspeed THEY
EQUATIONALLY balance to EC^3 ubed AEXO-DarkSpace and EVERY PROTON balanced
GRAY-JET micro-singularity & EVERY 'GALACTIC-HUB balanced GRAY-JET mega-
singulatiy' move to BLACK-HOLE STAGE and 'EAT' the entire GALACTIC MASS back into
AEXO-DarkSpace virtually from the INSIDE-OUT. AT THIS MOMENT they elicit MEGA-
GAMMA-RAY BURSTER JETS in the PROCESS heralding the COMING-HOME to AEXO-
DarkSpace which is the ultimate destination of ALL GALACTIC gray-jet-singularity
PROTON MASS & everyother wave-length speed-density upon the UBIQUITOUS GREEN-
'E'nergy MEBRANE.

OUR CURRENT (Centre-Universe) GRAND-CENTRAL GRAY-JET SINGULARTIY feeds
its SURROUNDING GALACTIC-ROOKERY NEBULAE which is the relative NUCLEUS of
OUR BUBBLE UNIVERSE and fortunately(or unfortunately) the ANALOGY to OUR
BUBBLE universe as us being a COSMIC BACTERTIA stands quite well! OOPs-oh-dear
again!~;-)

And much smaller GALACTIC-HUB GRAY-JET SINGULARITIES form the galaxies as
COSMIC-ORGANELLES upon the ubiquitous GREEN-1'E'nergy Space-Time MEMBRANE
of our BUBBLE UNIVERSE fluid-dynamic system OUT OF AEXO-DarkSpace---
EMPOWERED & ENERGIZED by AEXO-DarkSpace---->and finally BACK INTO AEXO-
DarkSpace!

THUSLY:~) St. Patrick's Day TIME-TRAVEL-MACHINE FORMULA-RATIOs for our
GREEN-1'E'nergy BUBBLE UNIVERSE go again as follows:

HYPER-TIME/Interstellar Space-Time=Base-Ambient GREEN-'E'nergy MEBRANE SPACE
@ (1-'E'nergy) Speed-Density: $1'E' = C^3$ ubed(light-speed cubed) SPEED x E/C^3 ubed
DENSITY.

BIO-PLANETARY 'TIME-RATE' flow @ PROTON-gray-jet micro-singularity ATOMIC
MASS= 1'E' DENSITY x C^2 qured (light-speed squared) SPEED.

HELICOID light-string @ light-speed= LIGHT @ 1'E'nergy X 'C' (light-speed).

EC/Light also = MINIMUM SPEED DENSITY @ the original super-plasmic spaghettifying
cloud @ the OUT SURFACE of ingressing BIG-BANG injected sub-AEXO-DarkSpace
super-plasma. And this HYPER-INITIALLY SLOWING DOWN super-plasma HELICOID
SPAGHETTIFIED ENERGY WAVE-STRING slows down to light-speed and eliciting THE
BIRTH FLASH surrounding the NOW NUCLEUS-NEBULA around the NOW REBOUND
GRAND-CENTRAL GRAY-JET UNIVERSE-EYE-SINGULARITY(ongoing).

*** Likely that LIGHT-SPEED outer FRINGE of the INITIAL INJECTED BIRTH NEBULA
plasma-cloud appeared to suddenly EMIT A HUGE 'FLASH' of FRINGE WAVE-FRONTs of
SPAGHETTIFIED Helicoid-'E' string TRAVELING @ light-speed('C').

*** ALSO NOTE: that that FLASH Light-Speed fringe ENERGY-SLOW-DOWN would have
been a product of the FIRST ENERGY @ light-speed to begin the LONG ACCELERATING
JOURNEY on the GREEN-'E'energy UNIVERSE InterStellar Space-Time MEMBRANE back
out to AEXO-DarkSpace @ the OUTER-BORDER of our BUBBLE UNIVERSE.
